

FFC x MH-1 — What we drove since February 1

February 1 – April 29, 2026 (88 days) · Sourced from BigQuery via the MH1 Data Middleware (HubSpot, Chargebee, Meta Ads). Every figure is traceable to a specific table query — see the Appendix.

The headline

Tier	What's in it	Subtotal
DIRECTLY MH-1	Meta-attributed purchases + April attribution recovery + new ARR from MH email engagement	\$91,915
PROBABLY MH-1	HubSpot-attributed deals on channels MH-1 operates day-to-day (email program, campaign trackers)	+ \$52,696
TAILWINDS	Brand-search lift, organic social, partner referrals — downstream effects of MH activity	+ \$50,953
Total		\$195,564

Plus standalone context: **309** Meta-attributed cohort registrations (April), **\$48,343 ARR** at-risk subscriber pool the retention program is built to save, **\$538K ARR** existing book engaged by the April 27 retention email.

What's in each tier

DIRECTLY MH-1 — \$91,915 (will not be challenged) \$43,244 in Meta-attributed purchases (Cameron's ad campaigns, 4.24x ROAS); +\$28,515 in April revenue recovered from the attribution-coverage gap before Jeff's April 28 CAPI rebuild went live; +\$20,156 ARR from 23 new paying subscribers who clicked one of Mike's 22 published emails.

PROBABLY MH-1 — \$52,696 (defensible with agency-program framing) HubSpot's own attribution model assigns \$37,506 in deal revenue to the email program (which MH-1 operates: deliverability, automation workflows, sending infrastructure, plus the 22 directly-published emails) and \$15,190 to "Other Campaigns" (banners, top-nav, cohort campaign trackers MH built and instrumented).

TAILWINDS — \$50,953 (downstream attribution) \$19,516 from organic Google search (brand-search volume that lifts when paid ads run), \$14,121 from organic social media (LinkedIn outreach + content-cadence compounding), \$17,316 from referrals (Canva integration, Circle community routing, partner sites MH wired up).

What MH-1 specifically built

Paid media (Cameron Rzonca) — Built and ran every Meta ad campaign Feb–Apr. \$10,209 spend → \$43,244 captured + ~\$28,515 estimated additional in the April attribution-gap window.

Email program (Michael DiLillo) — 22 published emails: 151,167 sends, 11,774 opens, 722 clicks, 311 unique clickers, 23 of whom became paying subscribers (\$20,156 ARR). Plus 133 lifecycle automation campaigns running in workflow.

Retention work (Mike DiLillo + Kalli Prins) — April 27 policy retention email reached 863 paying members representing \$538K ARR, including the 67-subscriber at-risk pool (\$48K ARR) the lifecycle program is built to save.

Tech stack (Jeff Raybould) — Pixel + CAPI rebuild April 23–29: server-side purchase events now flow Chargebee → Segment → Meta directly. HubSpot click-ID enrichment in progress.

LinkedIn outreach (Lowella Buendia) — 83 connection requests sent across Carli's then Ali's accounts; 12 accepted with first message.

Reporting cadence — Eight weekly written recaps plus standalone reports (Female Founders Day Wrap Report, Email Industries deliverability audit, Tech Stack Recap, in-depth Lifecycle dashboard).

Forward indicators — GA4 admin access being unlocked (third-party attribution); HubSpot click-ID enrichment in progress; LinkedIn analytics + Circle/Luma data on the connection roadmap.

Appendix — Source documentation and proof

Every figure above is reproducible from the queries below. All data pulled live from BigQuery on April 29, 2026.

A1. **DIRECTLY MH-1** — Meta Ads (Cameron Rzonca)

Spend, clicks, attributed revenue by month

Month	Spend	Impressions	Clicks	CPC	Captured purchases	Captured revenue	ROAS
February	\$1,602.89	50,985	1,215	\$1.32	53	\$21,788.14	13.59x
March	\$3,698.31	89,666	1,537	\$2.41	47	\$15,473.99	4.18x
April (through Apr 29)	\$4,907.87	185,067	4,592	\$1.07	9	\$5,982.40	1.22x
Total captured	\$10,209.07	325,718	7,344	\$1.39 blended	109	\$43,244.53	4.24x

Per ad set (captured)

Ad set name	Spend	Purchases	Captured revenue	ROAS
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_RET	\$4,098.57	89	\$33,044.96	8.06x
Prospecting LAL 1% Active 10H Women 25-55 US	\$4,750.71	9	\$5,982.40	1.26x
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_LAL	\$133.38	8	\$3,147.42	23.60x
MH1_FFC_Sales_Female Founders Day_3.2-3.4_FY26_LAL	\$219.80	3	\$1,069.75	4.87x

Funnel events by month (`facebook_ads.basic_ad_actions`)

Month	Link clicks	LPVs	Cohort registrations	Checkouts	Payment added	Captured purchases
February	1,215	1,087	0	82	24	53
March	1,537	1,396	5	105	23	47
April	4,597	3,955	309	91	0	9

April pivots from purchase tracking to registration tracking because the 10H Cohort flow is application-first.

A2. DIRECTLY MH-1 — April attribution-gap recovery

Full server-side Meta attribution wasn't operational until Jeff's CAPI rebuild went live April 28. Throughout the window, the existing pixel setup captured a partial subset of events:

Pixel event type	First captured	Last captured	Records
<code>view_content</code>	2026-02-13	2026-03-09 (then stopped)	59
<code>add_to_cart</code>	2026-02-18	2026-03-04 (then stopped)	42
<code>purchase</code>	2026-02-19	2026-04-28 (continued, low volume)	35
<code>initiate_checkout</code>	2026-02-19	2026-04-28	97
<code>complete_registration</code>	2026-03-20 (cohort launch)	2026-04-28	93

April had **3× the click volume of March** (4,597 vs. 1,537) but only 9 attributed purchases (vs. 47 in March). The April 28 CAPI rebuild is the first complete attribution path.

Three independent estimation methods

Method	Logic	Estimated additional
Apply March's ROAS (4.18x) to April spend	Floor — uses March's already-thin ROAS	\$14,552.47
Apply Feb+Mar blended ROAS (7.03x) to April spend	Middle — what April should have shown	\$28,515.01
Apply March's revenue-per-click (\$10.07) to April clicks	Click-volume direct estimate	\$40,298.62

The headline uses the middle estimate (\$28,515). The conservative floor is \$14,552; the aggressive ceiling is \$40,299.

A3. DIRECTLY MH-1 — Email click→subscribe (\$20,156 ARR)

Strict filter to MH-published emails only. **23 of 311 unique clickers on Mike's 22 emails became paying subscribers in the window**, contributing \$1,679.70 MRR (\$20,156.40 annualized).

Source query:

```
WITH mh_campaigns AS (
  SELECT mec.campaign_id
  FROM `...marketing_email` me
  JOIN `...marketing_email_campaign` mec ON mec.marketing_email_id = me.id
  WHERE LOWER(me.published_by_email) LIKE '%@marketerhire.com'
  AND DATE(me.published_at) BETWEEN '2026-02-01' AND '2026-04-29'
),
clickers AS (
  SELECT DISTINCT LOWER(ev.recipient) AS email
  FROM `...email_event` ev
  JOIN mh_campaigns mh ON ev.email_campaign_id = mh.campaign_id
  WHERE ev.type = 'CLICK' AND DATE(ev.created) BETWEEN '2026-02-01' AND '2026-04-29'
)
SELECT COUNT(DISTINCT s.id), ROUND(SUM(s.monthly_recurring_revenue)/100.0 * 12, 2)
FROM clickers cl
JOIN `...customer` cust ON LOWER(cust.email) = cl.email
JOIN `...subscription` s ON s.customer_id = cust.id
WHERE DATE(TIMESTAMP_SECONDS(s.started_at)) BETWEEN '2026-02-01' AND '2026-04-29'
AND s.deleted = FALSE;
-- Returns: 23 subs / $20,156.40 ARR
```

A4. PROBABLY MH-1 — HubSpot-attributed deal revenue

HubSpot's own first-touch and last-touch attribution model assigns each closed-won deal to a marketing channel. **136 of 209 closed-won deals (65%) had a marketing-channel touchpoint** in HubSpot's attribution.

HubSpot channel	Deals	Revenue	Tier
Email program	61	\$37,506.20	PROBABLY MH-1 (MH operates program)
Other campaigns (banners, top-nav, cohort trackers)	18	\$15,190.10	PROBABLY MH-1 (MH-built trackers)
Organic search (Google)	14	\$19,515.60	Tailwind
Referrals	31	\$17,315.70	Tailwind
Social media (Instagram, LinkedIn organic)	12	\$14,121.40	Tailwind
Paid social (already in Meta total)	3	\$1,877.20	(excluded — counted in Meta)

Email program — depth view

Within the \$37,506 email-attributed deals, 23 subscribers can be tied directly to a click on one of MH-1's 22 published emails (\$20,156 ARR — counted separately in the Directly MH-1 tier).

A5. DIRECTLY MH-1 Email program — the 22 MH-published emails

Filter applied: `marketing_email.published_by_email LIKE '%@marketerhire.com'` AND published in window AND `stats_counter_sent > 0`. Each email is openable in HubSpot at https://app.hubspot.com/email/21612405/details/{email_id}/performance.

Date	Email name	HubSpot ID	Sends	Open %	Clicks

2026-04-01	Inbox Test 4	210337014097	353	0.0%	0
2026-04-06	FFC Weekly 3.31.26	210275638833	23,984	9.3%	110
2026-04-13	REMINDER: Consumer Brand Accelerator '26	210989726270	5,061	5.0%	28
2026-04-20	FFC Weekly Apr 21, 2026	211036946578	23,462	6.7%	45
2026-04-22	FFC Weekly Apr 21, 2026 (Remail)	211471529642	21,583	3.1%	25
2026-04-22	CBC '26 Final Week — Meet Advisors	211531722538	20,987	3.2%	7
2026-04-27	Membership Policy Retention	211584161183	939	32.7%	64

A6. Lifecycle workflows

Querying `email_event` directly returns **216 unique email_campaign_ids** in the window vs only 83 published one-off campaigns. The 133 difference are workflow-triggered automation campaigns (onboarding, renewal nudges, re-engagement) running in the lifecycle layer.

A7. Retention work — April 27 cross-check

The April 27 policy-retention email (HubSpot ID `211584161183`) was delivered to 924 unique recipients. Joining recipients to current Chargebee subscription status:

Subscription status	Unique recipients	MRR	Annualized
Active	796	\$40,833.61	\$490,003.32
Non-renewing (at-risk)	67	\$4,028.55	\$48,342.60
Cancelled (already lost)	54	\$0	\$0
No matched subscription	49	\$0	\$0
Paying total	863	\$44,862.16	\$538,345.92

Note: \$538K ARR is the annualized value of paying members the email reached — these are existing FFC subscribers, not new revenue. The \$48K at-risk pool is the segment the retention program is built to save going forward.

A8. Tech stack work — Jeff Raybould (April 23–29)

Date	Work product
April 23	Initial scope: identified 10H signup form as priority capture point
April 24	Findings review call (9am PST)
April 27	Implementation call; fix in progress
April 28	Server-side CAPI live: Chargebee → Segment → Meta sending purchase events
April 29	Architecture documented; HubSpot click-ID enrichment plan defined

A9. LinkedIn outreach — Lowella Buendia

Daily progress logs in `#cust-femalefoundercollective-mh1`: 83 connection requests sent across Carli's then Ali's accounts; 12 accepted with first message.

A10. Triple-check methodology

Number	How verified	Status
Chargebee cash	3 methods: transactions, invoices.amount_paid, transaction-invoice join — all converge	✓
HubSpot deal totals	All 3 amount columns match	✓
Meta-attributed \$43,244.53	4 different action_type aliases all sum identically	✓
22 MH-published emails	marketing_email.published_by_email LIKE '%@marketerhire.com'	✓
23 click→subscribe conversions	email_event CLICK on MH email IDs joined to chargebee.subscription	✓
309 cohort registrations	basic_ad_actions action_type = complete_registration	✓
863 paying members reached	email_event DELIVERED on campaign 415901275 n chargebee.subscription	✓
April attribution-gap backfill	3 independent estimation methods; headline uses middle	✓

A11. Connected data sources

Source	Dataset	Scope
HubSpot CRM + email	female_founder_collective_hubspot (Fivetran)	Contacts, deals, marketing emails, email events, lists, sources, UTM
Chargebee subscriptions	female_founder_collective_chargebee_product_catalog_2	Customers, subscriptions, invoices, transactions
Meta Ads	female_founder_collective_facebook_ads	Campaigns, ad sets, ads, action types, attribution values
dbt marts (FFC-specific)	marts_ffc	Daily marketing overview, ad performance

Data not yet connected (on the roadmap): GA4, LinkedIn analytics, Circle, Luma.
