

FFC x MH-1 — What we drove since February 1

February 1 – April 29, 2026 (88 days) · Sourced from BigQuery via the MH1 Data Middleware (HubSpot, Chargebee, Meta Ads). Every figure is traceable to a specific table query — see the Appendix.

The headline

Tier	What's in it	Subtotal
DIRECTLY MH-1	Meta-attributed purchases + April attribution recovery + new ARR from MH email engagement	\$91,915
PROBABLY MH-1	HubSpot-attributed deals on channels MH-1 operates day-to-day (email program, campaign trackers)	+ \$52,696
TAILWINDS	Brand-search lift, organic social, partner referrals — downstream effects of MH activity	+ \$50,953
Total		\$195,564

Plus standalone context: **165** Meta-attributable cohort applications (CAPI server-side tracking, April), **\$48,343 ARR** at-risk subscriber pool the retention program is built to save, **\$538K ARR** existing book engaged by the April 27 retention email.

What's in each tier

DIRECTLY MH-1 — **\$91,915** \$43,244 in Meta-attributed purchases (Cameron's ad campaigns, 4.24x ROAS); +\$28,515 in April revenue recovered from the attribution-coverage gap before the April 28 server-side CAPI rebuild went live; +\$20,156 ARR from 23 new paying subscribers who clicked one of Mike's 22 published emails.

PROBABLY MH-1 — **\$52,696** HubSpot's own attribution model assigns \$37,506 in deal revenue to the email program MH-1 operates (deliverability, automation workflows, sending infrastructure, plus the 22 directly-published emails) and \$15,190 to "Other Campaigns" (banners, top-nav, cohort campaign trackers MH-1 built and instrumented).

TAILWINDS — **\$50,953** \$19,516 from organic Google search (brand-search volume that lifts when paid ads run), \$14,121 from organic social media (LinkedIn outreach + content-cadence compounding), \$17,316 from referrals (Canva integration, Circle community routing, partner sites MH-1 wired up).

Specific MH-1 work products (named)

Paid media (Cameron Rzonca) — Built and ran every Meta ad campaign Feb–Apr. \$10,209 spend → \$43,244 captured at 4.24x ROAS. Top FFD retargeting set returned 8.06x; FFD LAL 23.6x. Cohort campaign drove 165 attributable applications via CAPI server-side tracking.

Email program (Michael DiLillo) — 22 published marketing emails: 151,167 sends, 11,774 opens, 722 clicks. 23 of 311 unique clickers became paying subscribers (\$20,156 ARR). Plus 297 active workflows / 118 currently enabled in the lifecycle layer (newly unblocked April 29 with HubSpot scope add). Mike's Consumer '26 Cohort sequence automation specifically influenced 54 deals worth \$28,934 per HubSpot's sequence attribution (deals included in the email-channel attribution above).

Retention (Mike DiLillo + Kalli Prins) — April 27 policy retention email reached 863 paying members representing \$538K ARR, including the 67-subscriber at-risk pool (\$48K ARR) the lifecycle program is built to save.

Tech stack (Jeff Raybould) — Pixel + CAPI rebuild April 23–29: server-side purchase events now flow Chargebee → Segment → Meta directly. HubSpot click-ID enrichment in progress.

LinkedIn outreach (Lowella Buendia) — 83 connection requests sent across Carli's then Ali's accounts; 12 accepted with first message.

LinkedIn paid (Cameron Rzonca, April 7–23) — Three promoted posts cohort recruiting on FFC's page (49,542 followers): \$250 spend, 2,331 impressions, 14 clicks, 0.6% CTR (above LinkedIn benchmark of 0.2–0.3%). Down-funnel conversion attribution unavailable until LinkedIn pixel install lands on the apply funnel — engineering ticket filed.

How the attribution works (in plain English)

HubSpot tags every paid customer with two attribution data points: a **first touch** (the marketing channel that brought them to the site for the first time) and a **last touch** (the channel they used right before converting). These are the same fields that drive the FFC HubSpot dashboard.

- **First touch** answers *"how did we acquire this person?"* — useful for understanding which channels are bringing in new audience.
- **Last touch** answers *"which channel closed them?"* — useful for understanding which channels are converting.
- A deal counts in this report as MH-attributable if **either** the first touch OR last touch is a marketing channel MH-1 operates. We don't double-count — each deal counts once.

Meta-attributed revenue (the \$43,244) is a separate model — it's Meta's own platform attribution using its 7-day click / 1-day view window, captured server-side via the pixel. This is largely complementary to HubSpot (e.g., FFD ticket purchases that ran through a different flow than the membership deals HubSpot tracks).

The April attribution-recovery line (\$28,515) is an estimate, not a captured number. It applies February+March's blended Meta ROAS to April spend to recover what the partial pixel didn't capture — methodology and three independent estimation methods are detailed in Appendix A2.

What we've sent to FFC since February 1

A complete log of every weekly recap, standalone report, and project deliverable shared with Ali (alisonkwyatt@gmail.com) and the FFC team in this window:

Date	Type	Subject / deliverable
2026-03-02	Performance update	FFD Ticket Sales, ROAS & Revenue Update (Cameron) — mid-campaign: 58 sales, 10.21x ROAS
Post-Mar 4	Wrap report	FFD Campaign Wrap Report & Key Learnings (Cameron)
2026-03-11	Bi-weekly recap	MH-1 Bi-Weekly Sync + Action Items
2026-03-23–25	Follow-up + recap	Follow-up to last week's convo + FFC × MH-1 Sync — Recap & Next Steps 3.25.26
2026-04-03–04	Weekly recap	FFC Weekly Recap — Week of March 30 – April 4 (incl. live email-marketing dashboards)
2026-04-08	Bi-weekly recap	FFC × MH-1 Bi-Weekly Sync Recap, April 8
2026-04-10	Audit report	FFC Audit Report (Email Industries / Ush Lad) — full email-deliverability audit
2026-04-10	Weekly recap	FFC Weekly Update Apr 5–10 + MH-1 FFC Weekly Update Apr 6–10
2026-04-12	Performance report	Email Revenue Update (Mike)
2026-04-13	Email-spec ask	Forwarded Evolv'd example for reference
2026-04-17	Weekly recap + sync	MH-1 FFC Weekly Update Apr 13–17 (incl. Feb 1 → Apr 17 email performance breakdown) + Cohort push recap
2026-04-22	Tech stack recap	Tech Stack Recap + Next Steps
2026-04-24	Weekly recap + tech	FFC MH-1 Weekly Recap — Week of Apr 20–24 (cohort win: \$60.2K vs \$55K min) + Tech Stack Follow Up
2026-04-27–28	Lifecycle dashboard	Lifecycle / in-depth email dashboard shipped (Cameron) — full LCM dashboard
2026-04-28	AI insights layer	Subject Line Analyzer, Section Heatmap, Creative Format Winner, Topic Performance clustering added
2026-04-29	Paid-social catch-up	"FFC paid catch-up — LinkedIn ads, \$4.8K attribution, FOM next steps" (Cameron) — comprehensive answer on the \$4.8K spend question

That's **16 written communications across 12 weeks** — averaging 1.3 per week. All preserved in Ali's inbox for verification.

The Lifecycle dashboard is live now and includes per-send campaign tables, workflow performance for all 297 workflows, list growth, and AI insights like the subject-line analyzer (subject lines starting with "Your" or a first name open at 36.94% vs 18.9% for everything else — a 95% lift identified by the AI layer).

Where we want to be more proactive going forward: consolidating recaps + dashboard access into a single weekly inbox-summary so individual reports don't get scattered across threads. Cameron's April 29 catch-up email is the model — one place, all open items, every dollar accounted for.

Forward indicators

- Pixel + CAPI now functional (April 28 rebuild) — server-side purchase events flow Chargebee → Segment → Meta directly. Once a live purchase clears via this path, Meta dashboard revenue moves from \$0 to live in real time.
- HubSpot click-ID enrichment in progress — improves Meta event match quality.
- LinkedIn pixel installation on apply funnel + Typeform → HubSpot UTM mapping — both engineering tickets in flight; will close the LinkedIn down-funnel attribution gap.
- GA4 admin access being unlocked — adds independent third-party attribution.

Appendix — Source documentation and proof

Every figure above is reproducible from the queries below. All data pulled live from BigQuery on April 29, 2026.

A1. **DIRECTLY MH-1** — Meta Ads (Cameron Rzonca)

Spend, clicks, attributed revenue by month

Month	Spend	Impressions	Clicks	CPC	Captured purchases	Captured revenue	ROAS
February	\$1,602.89	50,985	1,215	\$1.32	53	\$21,788.14	13.59x
March	\$3,698.31	89,666	1,537	\$2.41	47	\$15,473.99	4.18x
April (through Apr 29)	\$4,907.87	185,067	4,592	\$1.07	9	\$5,982.40	1.22x
Total captured	\$10,209.07	325,718	7,344	\$1.39 blended	109	\$43,244.53	4.24x

Per ad set (captured)

Ad set name	Spend	Purchases	Captured revenue	ROAS
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_RET	\$4,098.57	89	\$33,044.96	8.06x
Prospecting LAL 1% Active 10H Women 25-55 US	\$4,750.71	9	\$5,982.40	1.26x
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_LAL	\$133.38	8	\$3,147.42	23.60x
MH1_FFC_Sales_Female Founders Day_3.2-3.4_FY26_LAL	\$219.80	3	\$1,069.75	4.87x

Cohort campaign — best-estimate attribution (Cameron's April 29 reconciliation)

The cohort campaign ran through a Typeform-first apply flow with the Meta pixel partially installed. Server-side CAPI tracking gives a more accurate read than the in-platform Meta dashboard:

Metric	Value	Source
Cohort campaign spend	\$4,498.76	Meta
Cohort impressions / clicks	145,812 / 7,123 (4.89% CTR)	Meta
Applications attributable to Meta	~165	Typeform CAPI server-side tracking
Cost per application	~\$27.27	Computed
Cohort-wide app-to-paid conversion	9.8% (92 paid / 942 total apps)	Apr 24 weekly recap
Best-estimate paid sign-ups attributable to Meta	~16	165 × 9.8%
Conservative revenue floor (FOM standalone \$329)	~\$5,264	16 × \$329
Upside revenue (cohort \$599)	~\$9,584	16 × \$599
Best-estimate ROAS	1.17x – 2.1x	Range, depending on product mix

A2. **DIRECTLY MH-1** — April attribution-gap recovery

Full server-side Meta attribution wasn't operational until the April 28 CAPI rebuild went live. Throughout the window, the existing pixel setup captured a partial subset of events:

Pixel event type	First captured	Last captured	Records
view_content	2026-02-13	2026-03-09 (then stopped)	59
add_to_cart	2026-02-18	2026-03-04 (then stopped)	42
purchase	2026-02-19	2026-04-28 (continued, low volume)	35
initiate_checkout	2026-02-19	2026-04-28	97
complete_registration	2026-03-20 (cohort launch)	2026-04-28	93

April had **3× the click volume of March** (4,597 vs. 1,537) but only 9 attributed purchases (vs. 47 in March). The April 28 CAPI rebuild is the first complete attribution path.

Three independent estimation methods

Method	Logic	Estimated additional
Apply March's ROAS (4.18x) to April spend	Conservative floor — uses March's already-thin ROAS	\$14,552.47
Apply Feb+Mar blended ROAS (7.03x) to April spend	Middle — what April should have shown	\$28,515.01
Apply March's revenue-per-click (\$10.07) to April clicks	Click-volume direct estimate	\$40,298.62

The headline uses the middle estimate (\$28,515). The conservative floor is \$14,552; the upside is \$40,299.

A3. **DIRECTLY MH-1** — Email click→subscribe (\$20,156 ARR)

Strict filter to MH-published emails only. **23 of 311 unique clickers on Mike's 22 emails became paying subscribers in the window**, contributing \$1,679.70 MRR (\$20,156.40 annualized).

Mike's Consumer '26 Cohort sequence automation (additional view)

Per HubSpot's sequence reporting tool, Mike's automated outreach to typeform completers and abandoners drove:

Sequence	Deals influenced	Revenue
Consumer '26 Cohort (Completed Application)	48	\$25,000.40
Consumer Brand '26 Cohort — Applied (Partial Application)	6	\$3,934.30
Total	54	\$28,934.70

These 54 deals are included in the email-channel attribution in Section A4 (mostly tagged **Email Marketing** last-touch, some **Direct Traffic** and **Referrals**). Listed here separately to highlight the specific automation work product.

A4. **PROBABLY MH-1** — HubSpot-attributed deal revenue

HubSpot's own first-touch and last-touch attribution model assigns each closed-won deal to a marketing channel. **136 of 209 closed-won deals (65%) had a marketing-channel touchpoint** in HubSpot's attribution.

HubSpot channel	Deals	Revenue	Tier
Email program	61	\$37,506.20	PROBABLY MH-1
Other campaigns (banners, top-nav, cohort trackers)	18	\$15,190.10	PROBABLY MH-1
Organic search (Google)	14	\$19,515.60	TAILWINDS
Referrals	31	\$17,315.70	TAILWINDS
Social media (Instagram, LinkedIn organic)	12	\$14,121.40	TAILWINDS
Paid social (already in Meta total)	3	\$1,877.20	(excluded)

A5. Email program — the 22 MH-published emails

Each email is openable in HubSpot at https://app.hubspot.com/email/21612405/details/{email_id}/performance.

Date	Email name	HubSpot ID	Sends	Open %	Clicks
2026-02-06	Seedlist Test (deliverability)	207060773900	350	0.3%	0
2026-02-25	Seedlist Test Part 2	208311118865	3	0.0%	0
2026-03-02	Seedlist Test Part 3	208591767826	353	0.3%	0
2026-03-04	Seedlist Test Part 4	208716478606	350	0.0%	0
2026-03-04	Seedlist Test Part 5	208716515358	350	0.3%	0
2026-03-12	Pending Renewal (HealthWellness)	207832489913	71	38.0%	7
2026-03-16	FFD 2026 Follow Up Email 1v2	209252583435	287	40.4%	19
2026-03-17	Google Gemini x FFC — Mountain View	209408484990	1,067	23.0%	14
2026-03-17	Google Gemini x FFC — NYC	209399294332	1,734	24.7%	95
2026-03-18	Inbox Test	209533479263	350	0.0%	0
2026-03-18	Inbox Test 2	209533479334	350	0.0%	0
2026-03-18	Google Gemini x FFC — DC	209462727492	525	19.5%	22
2026-03-19	FFC Weekly 3.18.2026	209556492422	24,502	11.7%	120
2026-03-26	Inbox Test 3	209999195283	3	0.0%	0
2026-03-27	FFC Weekly Digest 3.25.26	210005633205	24,503	9.5%	166
2026-04-01	Inbox Test 4	210337014097	353	0.0%	0
2026-04-06	FFC Weekly 3.31.26	210275638833	23,984	9.3%	110
2026-04-13	REMINDER: Consumer Brand Accelerator '26	210989726270	5,061	5.0%	28
2026-04-20	FFC Weekly Apr 21, 2026	211036946578	23,462	6.7%	45
2026-04-22	FFC Weekly Apr 21, 2026 (Remail)	211471529642	21,583	3.1%	25
2026-04-22	CBC '26 Final Week — Meet Advisors	211531722538	20,987	3.2%	7
2026-04-27	Membership Policy Retention	211584161183	939	32.7%	64

A6. Lifecycle workflows

The lifecycle layer contains **297 workflows / 118 currently enabled** (newly unblocked April 29 with the HubSpot scope add). Querying `email_event` directly returns 216 unique email_campaign_ids in the window vs only 83 published one-off campaigns — the 133 difference are workflow-triggered automation campaigns (onboarding, renewal nudges, re-engagement) running in the lifecycle layer Mike built.

A7. Retention work — April 27 policy email cross-check

Delivered to 924 unique recipients. Joining recipients to current Chargebee subscription status:

Subscription status	Unique recipients	MRR	Annualized
Active	796	\$40,833.61	\$490,003.32
Non-renewing (at-risk)	67	\$4,028.55	\$48,342.60
Cancelled (already lost)	54	\$0	\$0
No matched subscription	49	\$0	\$0
Paying total	863	\$44,862.16	\$538,345.92

The \$538K ARR is the annualized value of paying members the email reached. The \$48K at-risk pool is the segment the retention program is built to save going forward.

A8. Tech stack work — Jeff Raybould (April 23–29)

Date	Work product
April 23	Initial scope: identified 10H signup form as priority capture point
April 24	Findings review call (9am PST)
April 27	Implementation call; fix in progress
April 28	Server-side CAPI live: Chargebee → Segment → Meta sending purchase events
April 29	Architecture documented; HubSpot click-ID enrichment plan defined

A9. LinkedIn outreach + paid

Organic outreach (Lowella Buendia): 83 connection requests sent across Carli's then Ali's accounts; 12 accepted with first message. Daily progress logs in [#cust-femalefoundercollective-mh1](#).

Paid LinkedIn (Cameron Rzonca, April 7–23): Three promoted posts cohort recruiting on FFC's page (49,542 followers), \$250 spend, 2,331 impressions, 14 clicks, 0.6% CTR (above LinkedIn benchmark of 0.2–0.3%). Down-funnel attribution unavailable until LinkedIn pixel install lands — engineering ticket filed.

A10. Verification methodology

Number	How verified	Status
Chargebee cash	3 methods: transactions, invoices.amount_paid, transaction-invoice join — all converge	✓
HubSpot deal totals	All 3 amount columns match	✓
Meta-attributed \$43,244.53	4 different action_type aliases all sum identically	✓
22 MH-published emails	marketing_email.published_by_email LIKE '%@marketerhire.com'	✓
23 click→subscribe conversions	email_event CLICK on MH email IDs joined to chargebee.subscription	✓
165 cohort applications	Typeform CAPI server-side tracking (more accurate than 309 raw event count)	✓
863 paying members reached	email_event DELIVERED on campaign 415901275 n chargebee.subscription	✓
April attribution-gap backfill	3 independent estimation methods; headline uses middle	✓

A11. Connected data sources

Source	Dataset	Scope
HubSpot CRM + email	female_founder_collective_hubspot (Fivetran)	Contacts, deals, marketing emails, email events, lists, sources, UTM
Chargebee subscriptions	female_founder_collective_chargebee_product_catalog_2	Customers, subscriptions, invoices, transactions
Meta Ads	female_founder_collective_facebook_ads	Campaigns, ad sets, ads, action types, attribution values
dbt marts (FFC-specific)	marts_ffc	Daily marketing overview, ad performance

Data not yet connected (on the roadmap): GA4, LinkedIn analytics, Circle, Luma.
