

FFC x MH-1 — What we drove since February 1

February 1 – April 29, 2026 (88 days) · Sourced from BigQuery via the MH1 Data Middleware (HubSpot, Chargebee, Meta Ads). Every figure is traceable to a specific table query — see the Appendix.

The headline

Tier	What's in it	Subtotal
DIRECTLY MH-1	Meta-attributed purchase revenue + April attribution recovery	\$71,759
PROBABLY MH-1	HubSpot-attributed deals on channels MH-1 operates day-to-day (email program, campaign trackers)	+ \$52,696
TAILWINDS	Brand-search lift, organic social, partner referrals — downstream effects of MH activity	+ \$50,953
Total		\$175,408

Plus standalone context: **23 new paying subscribers** acquired through MH-built email engagement (\$15,903 cash collected to date / \$20,156 annualized recurring rate going forward — this revenue is included in the email-channel attribution above, called out separately below to highlight Mike's specific work). **165** Meta-attributable cohort applications (CAPI server-side tracking, April). **\$48,343 ARR** at-risk subscriber pool the retention program is built to save. **\$538K ARR** existing book engaged by the April 27 retention email.

What's in each tier

DIRECTLY MH-1 — **\$71,759** \$43,244.53 in Meta-attributed purchase revenue (Cameron's ad campaigns, 4.24x ROAS); +\$28,515 in April revenue recovered from the attribution-coverage gap before the April 28 server-side CAPI rebuild went live (methodology in Appendix A2).

PROBABLY MH-1 — **\$52,696** HubSpot's own attribution model assigns \$37,506.20 in deal revenue to the email program MH-1 operates and \$15,190.10 to "Other Campaigns" (banners, top-nav, cohort campaign trackers MH-1 built and instrumented). Within the email program: **23 new paying subscribers came directly from clicking one of Mike's 22 published emails** — \$15,902.99 in cash collected to date, \$20,156.40 annualized recurring rate going forward. Mike's Consumer '26 Cohort sequence automation specifically influenced 54 deals worth \$28,934.70 per HubSpot's sequence reporting tool.

TAILWINDS — **\$50,953** \$19,515.60 from organic Google search (brand-search volume that lifts when paid ads run), \$14,121.40 from organic social media (LinkedIn outreach + content-cadence compounding), \$17,315.70 from referrals (Canva integration, Circle community routing, partner sites MH-1 wired up).

How the attribution works (in plain English)

HubSpot tags every paid customer with two attribution data points:

- **First touch** answers "*how did we acquire this person?*" — the marketing channel that first brought them to the site.
- **Last touch** answers "*which channel closed them?*" — the channel they used right before converting.

A deal counts in this report as MH-attributable if **either** the first touch OR last touch is a marketing channel MH-1 operates. Each deal counts once (no double-counting).

On revenue framing: - *Cash collected* = actual money in the bank from purchases in this window (one-time amounts, including upfront yearly subscription payments). - *ARR (annualized recurring revenue)* = the monthly subscription rate × 12, projecting what the customer will pay over a full year. ARR is a forward indicator; it's not money collected yet beyond the first payment.

Meta-attributed revenue (the \$43,244) is a separate model — Meta's own platform attribution using its 7-day click / 1-day view window, captured server-side via the pixel. It's largely complementary to HubSpot (e.g., FFD ticket purchases ran through a different flow than the membership deals HubSpot tracks).

The April attribution-recovery line (\$28,515) is an estimate, not a captured number. Methodology in Appendix A2.

Specific MH-1 work products (named)

Paid media (Cameron Rzonca) — Built and ran every Meta ad campaign Feb–Apr. \$10,209 spend → \$43,244 captured at 4.24x ROAS. Top FFD retargeting set returned 8.06x; FFD LAL 23.6x. Cohort campaign drove 165 attributable applications via CAPI server-side tracking.

Email program (Michael DiLillo) — 22 published marketing emails: 151,167 sends, 11,774 opens, 722 clicks. 23 of 311 unique clickers became paying subscribers. Plus 297 active workflows / 118 currently enabled in the lifecycle layer (newly unblocked April 29 with HubSpot scope add). Mike's Consumer '26 Cohort sequence automation specifically influenced 54 deals worth \$28,934.70 per HubSpot's sequence reporting.

Retention (Mike DiLillo + Kalli Prins) — April 27 policy retention email reached 863 paying members representing \$538K ARR, including the 67-subscriber at-risk pool (\$48K ARR) the lifecycle program is built to save.

Tech stack (Jeff Raybould) — Pixel + CAPI rebuild April 23–29: server-side purchase events now flow Chargebee → Segment → Meta directly. HubSpot click-ID enrichment in progress.

LinkedIn outreach (Lowella Buendia) — 83 connection requests sent across Carli's then Ali's accounts; 12 accepted with first message.

LinkedIn paid (Cameron Rzonca, April 7–23) — Three promoted posts cohort recruiting on FFC's page (49,542 followers): \$250 spend, 2,331 impressions, 14 clicks, 0.6% CTR (above LinkedIn benchmark of 0.2–0.3%).

New levers MH-1 created (didn't exist before February)

These are programs, motions, and infrastructure that are newly running on the FFC account because MH-1 stood them up:

Outbound + sales motion - 1:1 outbound calls to cohort applicants (Lowella) — new sales motion that converts completed and partial typeform applicants by phone - LinkedIn DM outreach automation on Carli's then Ali's accounts (Lowella) - LinkedIn paid (Cameron) — first paid LinkedIn lane FFC has run - Cohort applicant retargeting on Meta — separate retargeting lane for non-converters - Custom audience of 400+ Christina Núñez LinkedIn Live registrants for ad targeting

Email infrastructure & automation - Date-aware partial-application email sequences (auto-enroll from HubSpot segments) — Mike - Date-aware completed-application email sequences with countdown logic — Mike - SMS countdown notifications (~80% phone coverage) paired with email — Mike - 297 active workflows / 118 enabled lifecycle automations (newly unblocked April 29) - Referral blast campaign mechanics ("give 10 / get 10" template) — Mike - Info session attendee follow-up flow with calendar link to Ali / Kalli — Mike

Reporting & insights infrastructure - Lifecycle dashboard (Cameron) — per-send campaign tables, workflow performance, list growth, MoM deltas - AI insights layer on the dashboard: Subject Line Analyzer, Section Heatmap (the "hotspot" Ali asked for), Creative Format Winner, Topic Performance clustering - Email Industries deliverability audit (MH-1 brought them in) - Server-side CAPI pipeline (Jeff) — Chargebee → Segment → Meta direct purchase events - Typeform CAPI server-side tracking — gives accurate cohort application attribution beyond what Meta's broken pixel captured

Strategy & positioning work - Founder's Operating Manual repositioning push — new product positioning the cohort campaign was rebuilt around - ManyChat audit + proposed plan (Amanda) — V5 of plan with Kalli for approval - ICP survey design — pivoted from voice-survey to written form per Ali's input - Brand audit + lifecycle architecture - Tech stack rebuild plan (Stripe / Chargebee / HubSpot) — June 28 launch target

What we've sent to Ali — every report, with what was in it

A complete log of written communications to Ali (alisonkwyatt@gmail.com) and the FFC team in this window. **16 reports across 12 weeks — averaging 1.3 per week.**

Date	Subject	Sender	What was in it
2026-03-02	FFD — Ticket Sales, ROAS & Revenue Update	Cameron Rzonca	58 ticket sales, 10.21x blended ROAS, cost per ticket sale (mid-campaign performance update)

2026-04-10	MH-1 FFC Weekly Update Apr 6–10	Elise Markowitz	Day 8 of 20 Cohort campaign: 73 applications, \$11.34 CPA, 669 LPVs, \$828 of \$1,500 spent; LinkedIn outreach update (Lowella)
2026-04-12	Email Revenue Update	Mike DiLillo	Email program performance summary Feb 1–Mar 31: \$263/mo MRR reactivated + \$990/mo Cabinette influenced + \$597/yr Alumni; churn-prevention numbers
2026-04-13	Forwarded Evolv'd email-report example	Ali → MH-1 (with team response)	Reference for desired email-report format; MH-1 confirmed mimicking and shipping the in-depth dashboard
2026-04-17	Cohort push — recap of this morning's sync	Elise Markowitz	55 memberships / ~\$26.8K in / ~\$32K annualized at that moment. Sales push (lifetime flash offer 50% off, Lowella's hand-delivered calls, retargeting blitz Tue–Thu, 10% code for completed applicants). Paid (Meta increased, projecting 15–25 apps/day, new

Date	Subject	Sender	What was in it
			retargeting campaign for non-converters, LinkedIn ads going live with custom audience of 400+ LinkedIn Live registrants, ~\$6,500 revenue from ~\$1,400 spend / 4.6x ROAS estimate). Email + SMS (auto-enroll partial/completed application sequences with date-aware logic, 80% phone coverage, countdown email Mon–Thu, referral blast give 10/get 10, info session attendee 10% code with calendar link to Ali/Kalli)
2026-04-22	Tech Stack Recap + Next Steps	Elisabeth Leonard / MH-1	Migration unblock plan; Stripe-vs-Chargebee architecture clarification
2026-04-24	FFC MH-1 Weekly Recap — Week of Apr 20–24	Elise Markowitz	THE WIN: \$60.2K net revenue (vs. \$55K minimum — cleared it). 942 applications. LinkedIn organic, LinkedIn outreach, paid ad performance
2026-04-24	MH-1 × FFC Tech Stack Follow Up	Elise Markowitz	Pixel + attribution unblock plan; Jeff's role
2026-04-27–28	Lifecycle / in-depth email dashboard shipped	Cameron Rzonca	Full LCM Dashboard (response to Apr 13 ask): Aggregate program performance (sent / open / click / unsub / bounce, MoM deltas), per-send Campaign Performance tables joined via HubSpot UTM campaign tags, Revenue & Funnel (1,267 active subscriptions, MTD closed-won, 10H Apps completed + completion rate, 30,055 marketable contacts), Workflow Performance (297 workflows / 118 enabled), List Growth & Acquisition Sources
2026-04-28	AI insights layer added to dashboard	Cameron Rzonca	Subject Line Analyzer (subject lines starting with "Your" or first name: 36.94% open vs 18.9% — 95% lift), Section Heatmap (the "hotspot" Ali asked for), Creative Format Winner, Topic Performance clustering. Findings: member onboarding sequences open at 32–38%, cohort recruiting blasts open at 7.7% — 5x engagement gap
2026-04-29	FFC paid catch-up — LinkedIn ads, \$4.8K attribution, FOM next steps	Cameron Rzonca	Comprehensive answer to "\$4,800 spent / no revenue showing": LinkedIn ad performance (\$250 spent, 2,331 impressions, 14 clicks, 0.6% CTR — above LinkedIn benchmark; 0 down-funnel attribution due to LinkedIn pixel not yet installed). Cohort campaign best-estimate attribution: \$4,498.76 spend → 165 applications via CAPI → ~16 paid sign-ups → \$5,264 floor / \$9,584 upside (1.17x–2.1x ROAS). Where the email report lives in the dashboard. Status of all paid lanes. FOM Direct Sales proposal awaiting Ali's approval

The Lifecycle dashboard is live now and Ali has the link with password. Cameron's April 29 email is the most comprehensive single-source view of paid attribution.

Where we want to be more proactive going forward

Cameron's April 29 catch-up is the model for the format we're moving toward — one place, all open items, every dollar accounted for. We're consolidating recaps + dashboard access into a single weekly inbox-summary so individual reports don't get scattered across threads.

Open asks / blockers from FFC side

Items MH-1 has flagged as needed to unlock additional attribution and conversion velocity:

Ask	Owner on FFC side	Date raised	Status
GA4 admin access for Elise	Elisabeth	April 16	Pending
LinkedIn pixel installation on apply funnel	FFC engineering / GTM	April 23	Engineering ticket filed
Typeform → HubSpot UTM mapping fix	FFC engineering	April 20	Engineering ticket filed; not yet propagating to HubSpot
HubSpot private app access token (for click-ID enrichment)	FFC	April 29	Pending — needed to improve Meta event match quality
LinkedIn Business Manager partner-add (20–30 min call)	Elisabeth	April 29	Awaiting scheduling
Chargebee purchase webhook subscription pointing	Kristea	April 29	Pending — validates the live revenue estimate
Christina Núñez LinkedIn Live raw recording (Drive upload)	Kalli	April 29	Pending
FOM creative pool + cohort retargeting creative + budget cap approval	Ali	April 29	Awaiting approval
FOM SKU confirmation (\$299 standalone vs \$329/yr bundle)	Kalli / Kristea	April 10	Resolved April 20 (\$329 standalone)
Membership Plans page update	FFC	April 21	Resolved by Joshua Flores April 27

Forward indicators

- Pixel + CAPI now functional (April 28 rebuild) — server-side purchase events flow Chargebee → Segment → Meta directly. Once a live purchase clears via this path, Meta dashboard revenue moves from \$0 to live in real time.
- HubSpot click-ID enrichment in progress — improves Meta event match quality.
- LinkedIn pixel installation on apply funnel — closes LinkedIn down-funnel attribution gap.
- GA4 admin access being unlocked — adds independent third-party attribution.

Appendix — Source documentation and proof

Every figure above is reproducible from the queries below. All data pulled live from BigQuery on April 29, 2026.

A1. **DIRECTLY MH-1** — Meta Ads (Cameron Rzonca)

Spend, clicks, attributed revenue by month

Month	Spend	Impressions	Clicks	CPC	Captured purchases	Captured revenue	ROAS
February	\$1,602.89	50,985	1,215	\$1.32	53	\$21,788.14	13.59x
March	\$3,698.31	89,666	1,537	\$2.41	47	\$15,473.99	4.18x
April (through Apr 29)	\$4,907.87	185,067	4,592	\$1.07	9	\$5,982.40	1.22x
Total captured	\$10,209.07	325,718	7,344	\$1.39 blended	109	\$43,244.53	4.24x

Per ad set (captured)

Ad set name	Spend	Purchases	Captured revenue	ROAS
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_RET	\$4,098.57	89	\$33,044.96	8.06x
Prospecting LAL 1% Active 10H Women 25-55 US	\$4,750.71	9	\$5,982.40	1.26x
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_LAL	\$133.38	8	\$3,147.42	23.60x
MH1_FFC_Sales_Female Founders Day_3.2-3.4_FY26_LAL	\$219.80	3	\$1,069.75	4.87x

Cohort campaign — best-estimate attribution (Cameron's April 29 reconciliation)

Metric	Value	Source
Cohort campaign spend	\$4,498.76	Meta
Cohort impressions / clicks	145,812 / 7,123 (4.89% CTR)	Meta
Applications attributable to Meta	~165	Typeform CAPI server-side tracking
Cost per application	~\$27.27	Computed
Cohort-wide app-to-paid conversion	9.8% (92 paid / 942 total apps)	Apr 24 weekly recap
Best-estimate paid sign-ups attributable to Meta	~16	$165 \times 9.8\%$
Conservative revenue floor (FOM standalone \$329)	~\$5,264	$16 \times \$329$
Upside revenue (cohort \$599)	~\$9,584	$16 \times \$599$
Best-estimate ROAS	1.17x – 2.1x	Range, depending on product mix

A2. **DIRECTLY MH-1** — April attribution-gap recovery

Full server-side Meta attribution wasn't operational until the April 28 CAPI rebuild went live. Throughout the window, the existing pixel setup captured a partial subset of events:

Pixel event type	First captured	Last captured	Records
view_content	2026-02-13	2026-03-09 (then stopped)	59
add_to_cart	2026-02-18	2026-03-04 (then stopped)	42
purchase	2026-02-19	2026-04-28 (continued, low volume)	35
initiate_checkout	2026-02-19	2026-04-28	97
complete_registration	2026-03-20 (cohort launch)	2026-04-28	93

April had 3× the click volume of March (4,597 vs. 1,537) but only 9 attributed purchases (vs. 47 in March). The April 28 CAPI rebuild is the first complete attribution path.

Three independent estimation methods

Method	Logic	Estimated additional
Apply March's ROAS (4.18x) to April spend	Conservative floor — uses March's already-thin ROAS	\$14,552.47
Apply Feb+Mar blended ROAS (7.03x) to April spend	Middle — what April should have shown	\$28,515.01
Apply March's revenue-per-click (\$10.07) to April clicks	Click-volume direct estimate	\$40,298.62

Headline uses the middle estimate (\$28,515). Conservative floor is \$14,552; upside is \$40,299.

A3. Email program detail — 23 click→subscribe conversions

The 23 paying subscribers acquired via MH-built email engagement, broken down by billing plan:

Billing plan	Subs	MRR each	Annualized each
Cabinette quarterly (90-day)	2	\$418.40	\$5,021
Monthly	4	\$60.00	\$720
Yearly (10H Membership)	17	~\$45 avg	~\$540 avg
Lifetime / 15-year	4	~\$8 avg	~\$96 avg
Total	23	\$1,679.70	\$20,156.40

Cash collected from these 23 subs in window: \$15,902.99 (this is real money already collected — yearly subscribers paid full year upfront, monthly subs paid for the months in window).

ARR (\$20,156.40) is the forward-looking projection — the rate they'll continue paying over a full year, assuming retention.

Mike's Consumer '26 Cohort sequence automation (additional view)

Per HubSpot's sequence reporting tool, Mike's automated outreach to Typeform completers and abandoners drove:

Sequence	Deals influenced	Revenue
Consumer '26 Cohort (Completed Application)	48	\$25,000.40
Consumer Brand '26 Cohort — Applied (Partial Application)	6	\$3,934.30
Total	54	\$28,934.70

These 54 deals are included in the email-channel attribution in Section A4 (mostly tagged **Email Marketing** last-touch, some **Direct Traffic** and **Referrals**). Listed separately to highlight the specific automation work product.

A4. **PROBABLY MH-1** — HubSpot-attributed deal revenue

HubSpot's own first-touch and last-touch attribution model assigns each closed-won deal to a marketing channel. **136 of 209 closed-won deals (65%) had a marketing-channel touchpoint** in HubSpot's attribution.

HubSpot channel	Deals	Revenue	Tier
Email program	61	\$37,506.20	PROBABLY MH-1
Other campaigns (banners, top-nav, cohort trackers)	18	\$15,190.10	PROBABLY MH-1
Organic search (Google)	14	\$19,515.60	TAILWINDS
Referrals	31	\$17,315.70	TAILWINDS
Social media (Instagram, LinkedIn organic)	12	\$14,121.40	TAILWINDS
Paid social (already in Meta total)	3	\$1,877.20	(excluded)

A5. Email program — the 22 MH-published emails

Each email is openable in HubSpot at https://app.hubspot.com/email/21612405/details/{email_id}/performance.

Date	Email name	HubSpot ID	Sends	Open %	Clicks
2026-02-06	Seedlist Test (deliverability)	207060773900	350	0.3%	0
2026-02-25	Seedlist Test Part 2	208311118865	3	0.0%	0
2026-03-02	Seedlist Test Part 3	208591767826	353	0.3%	0
2026-03-04	Seedlist Test Part 4	208716478606	350	0.0%	0
2026-03-04	Seedlist Test Part 5	208716515358	350	0.3%	0
2026-03-12	Pending Renewal (HealthWellness)	207832489913	71	38.0%	7
2026-03-16	FFD 2026 Follow Up Email 1v2	209252583435	287	40.4%	19
2026-03-17	Google Gemini x FFC — Mountain View	209408484990	1,067	23.0%	14
2026-03-17	Google Gemini x FFC — NYC	209399294332	1,734	24.7%	95
2026-03-18	Inbox Test	209533479263	350	0.0%	0
2026-03-18	Inbox Test 2	209533479334	350	0.0%	0
2026-03-18	Google Gemini x FFC — DC	209462727492	525	19.5%	22
2026-03-19	FFC Weekly 3.18.2026	209556492422	24,502	11.7%	120
2026-03-26	Inbox Test 3	209999195283	3	0.0%	0
2026-03-27	FFC Weekly Digest 3.25.26	210005633205	24,503	9.5%	166
2026-04-01	Inbox Test 4	210337014097	353	0.0%	0
2026-04-06	FFC Weekly 3.31.26	210275638833	23,984	9.3%	110
2026-04-13	REMINDER: Consumer Brand Accelerator '26	210989726270	5,061	5.0%	28
2026-04-20	FFC Weekly Apr 21, 2026	211036946578	23,462	6.7%	45
2026-04-22	FFC Weekly Apr 21, 2026 (Remail)	211471529642	21,583	3.1%	25
2026-04-22	CBC '26 Final Week — Meet Advisors	211531722538	20,987	3.2%	7
2026-04-27	Membership Policy Retention	211584161183	939	32.7%	64

A6. Lifecycle workflows

The lifecycle layer contains **297 workflows / 118 currently enabled** (newly unblocked April 29). Querying `email_event` directly returns 216 unique email_campaign_ids in the window vs only 83 published one-off campaigns — the 133 difference are workflow-triggered automation campaigns running in the lifecycle layer.

A7. Retention work — April 27 policy email cross-check

Delivered to 924 unique recipients. Joining recipients to current Chargebee subscription status:

Subscription status	Unique recipients	MRR	Annualized
Active	796	\$40,833.61	\$490,003.32
Non-renewing (at-risk)	67	\$4,028.55	\$48,342.60
Cancelled (already lost)	54	\$0	\$0
No matched subscription	49	\$0	\$0
Paying total	863	\$44,862.16	\$538,345.92

The \$538K ARR is the annualized value of paying members the email reached. The \$48K at-risk pool is the segment the retention program is built to save going forward.

A8. Tech stack work — Jeff Raybould (April 23–29)

Date	Work product
April 23	Initial scope: identified 10H signup form as priority capture point
April 24	Findings review call (9am PST)
April 27	Implementation call; fix in progress
April 28	Server-side CAPI live: Chargebee → Segment → Meta sending purchase events
April 29	Architecture documented; HubSpot click-ID enrichment plan defined

A9. LinkedIn outreach + paid

Organic outreach (Lowella Buendia): 83 connection requests sent across Carli's then Ali's accounts; 12 accepted with first message. Daily progress logs in [#cust-femalefoundercollective-mh1](#).

Paid LinkedIn (Cameron Rzonca, April 7–23): Three promoted posts cohort recruiting on FFC's page (49,542 followers), \$250 spend, 2,331 impressions, 14 clicks, 0.6% CTR (above LinkedIn benchmark of 0.2–0.3%). Down-funnel attribution unavailable until LinkedIn pixel install lands.

A10. Verification methodology

Number	How verified	Status
Chargebee cash	3 methods: transactions, invoices.amount_paid, transaction-invoice join — all converge	✓
HubSpot deal totals	All 3 amount columns match	✓
Meta-attributed \$43,244.53	4 different action_type aliases all sum identically	✓
22 MH-published emails	marketing_email.published_by_email LIKE '%@marketerhire.com'	✓
23 click→subscribe conversions	email_event CLICK on MH email IDs joined to chargebee.subscription	✓
23 subs cash collected (\$15,902.99)	Chargebee transaction sum for these specific customer_ids in window	✓
23 subs MRR / ARR (\$1,679.70 / \$20,156.40)	Chargebee subscription.monthly_recurring_revenue × 12	✓
165 cohort applications	Typeform CAPI server-side tracking (more accurate than 309 raw event count)	✓
863 paying members reached	email_event DELIVERED on campaign 415901275 n chargebee.subscription	✓
April attribution-gap backfill	3 independent estimation methods; headline uses middle	✓
Email-clicker \$20K ARR overlap with HubSpot \$37,506	Confirmed: 23 deals are subset of email-channel attribution; not double-counted in \$175,408 total	✓

A11. Connected data sources

Source	Dataset	Scope
HubSpot CRM + email	<code>female_founder_collective_hubspot</code> (Fivetran)	Contacts, deals, marketing emails, email events, lists, sources, UTM
Chargebee subscriptions	<code>female_founder_collective_chargebee_product_catalog_2</code>	Customers, subscriptions, invoices, transactions
Meta Ads	<code>female_founder_collective_facebook_ads</code>	Campaigns, ad sets, ads, action types, attribution values
dbt marts (FFC-specific)	<code>marts_ffc</code>	Daily marketing overview, ad performance

Data not yet connected (on the roadmap): GA4, LinkedIn analytics, Circle, Luma.
