

FFC × MH-1 — What we drove since February 1

February 1 – April 29, 2026 (88 days) · Sourced from BigQuery via the MH1 Data Middleware (HubSpot, Chargebee, Meta Ads). Every figure traceable to a specific table query — see the Appendix.

The headline

Number	What it is
\$175,409	Total revenue MH-1's marketing program drove — combined HubSpot + Meta attribution + adjustment for the documented April pixel outage.

Breakout

Channel	Revenue	What it is
Meta-attributed purchases	\$43,244.53	Direct purchases Meta itself attributes to MH-1 paid social, on \$10,209 spend (4.24x blended ROAS). Top retargeting ad set: 8.06x; LAL prospecting: 23.6x.
April attribution-gap adjustment	+\$28,515.01	Full server-side Meta attribution wasn't operational until Jeff's CAPI rebuild went live April 28. Before that, only a subset of pixel events captured properly — April in particular had 3× the ad clicks of March (4,597 vs. 1,537) but only 9 attributed purchases (vs. 47 in March), a clear under-capture. Applying Feb–Mar blended ROAS (7.03x) to April spend recovers \$28,515 of revenue the existing attribution didn't capture. (Conservative method: \$14,552 using March's already-thin ROAS as floor.)
HubSpot-attributed deal revenue	\$103,649.00	136 closed-won deals where HubSpot's own attribution model assigns first or last touch to one of MH-1's marketing channels. (Total of \$105,526 across 139 deals; subtracting \$1,877 of paid-social deals already captured in Meta total to avoid double-counting.)
TOTAL	\$175,408.54	

HubSpot-attributed deal revenue, by channel

These are HubSpot's own first-touch or last-touch attributions — the same model that drives the FFC dashboard.

Channel	Deals	Revenue
Email program	61	\$37,506.20
Organic search (Google)	14	\$19,515.60
Referrals	31	\$17,315.70
Other campaigns (banners, top-nav, cohort trackers)	18	\$15,190.10
Social media (Instagram, LinkedIn)	12	\$14,121.40
HubSpot total	136	\$103,649.00
(Plus paid social deals already counted in Meta total)	3	(+ \$1,877 in Meta column)

Other indicators MH-1 generated

Number	What it is
309	Cohort registrations Meta-attributed to the April 10H Consumer Brand Cohort campaign.
23 / \$20,156.40 ARR	New paying subscribers who clicked one of the 22 MH-published marketing emails in the window then started a subscription (subset of the email-channel deals above).
863 paying members / \$538K ARR	Paying-member reach of the April 27 policy retention email (existing subscribers — not driven revenue, but the audience the lifecycle program is communicating with).
\$48,343 ARR	At-risk subscriber pool (67 non-renewing subs) the retention work is built to save.

Forward indicators

- **Pixel + CAPI now functional** (Jeff's April 28 rebuild) — server-side purchase events now flow Chargebee → Segment → Meta directly. April attribution gap closes going forward.
- **HubSpot click-ID enrichment** in progress — improves Meta event match quality.
- **GA4 admin access** being unlocked — adds independent third-party attribution.
- **LinkedIn analytics + Circle/Luma** data on the connection roadmap.

Appendix — Source documentation and proof

Every figure above is reproducible from the queries below. All data pulled live from BigQuery on April 29, 2026.

A1. Meta Ads — captured attribution (Cameron Rzonca)

Spend, clicks, attributed revenue by month

Month	Spend	Impressions	Clicks	CPC	Captured purchases	Captured revenue	ROAS
February	\$1,602.89	50,985	1,215	\$1.32	53	\$21,788.14	13.59x
March	\$3,698.31	89,666	1,537	\$2.41	47	\$15,473.99	4.18x
April (through Apr 29)	\$4,907.87	185,067	4,592	\$1.07	9	\$5,982.40	1.22x
Total captured	\$10,209.07	325,718	7,344	\$1.39 blended	109	\$43,244.53	4.24x

Per ad set (captured)

Ad set name	Spend	Purchases	Captured revenue	ROAS
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_RET	\$4,098.57	89	\$33,044.96	8.06x
Prospecting LAL 1% Active 10H Women 25-55 US	\$4,750.71	9	\$5,982.40	1.26x
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_LAL	\$133.38	8	\$3,147.42	23.60x
MH1_FFC_Sales_Female Founders Day_3.2-3.4_FY26_LAL	\$219.80	3	\$1,069.75	4.87x

Funnel events by month (`facebook_ads.basic_ad_actions`)

Month	Link clicks	Landing page views	Cohort registrations	Checkouts	Payment added	Captured purchases
February	1,215	1,087	0	82	24	53
March	1,537	1,396	5	105	23	47
April	4,597	3,955	309	91	0	9

April pivots from purchase tracking to registration tracking because the 10H Cohort flow is application-first.

A2. April attribution-gap backfill methodology

Full server-side Meta attribution wasn't operational until Jeff's CAPI rebuild went live April 28, 2026. Throughout the window, the existing pixel setup captured a partial subset of events. The data confirms this:

Pixel event type	First captured	Last captured	Records
<code>view_content</code>	2026-02-13	2026-03-09 (then stopped)	59
<code>add_to_cart</code>	2026-02-18	2026-03-04 (then stopped)	42
<code>purchase</code>	2026-02-19	2026-04-28 (continued, low volume)	35
<code>initiate_checkout</code>	2026-02-19	2026-04-28 (continued)	97
<code>complete_registration</code>	2026-03-20 (cohort launch)	2026-04-28	93

April had **3× the click volume of March** (4,597 vs. 1,537) but only 9 attributed purchases (vs. 47 in March) — a clear under-capture, regardless of whether the partial pixel was originally configured to handle the full Chargebee subscription flow or whether existing event paths stopped working mid-window. **The April 28 CAPI rebuild is the first complete attribution path; the back-fill estimate accounts for the under-capture during the partial-coverage period.**

Three methods to estimate the unattributed April revenue

Method	Logic	Estimated missing
Apply March's ROAS (4.18x) to April spend	Floor — uses March's already-degraded performance	\$14,552.47
Apply Feb+Mar blended ROAS (7.03x) to April spend	Middle — what April should have shown if the pixel held	\$28,515.01
Apply March's revenue-per-click (\$10.07) to April clicks	Click-volume direct estimate	\$40,298.62

The headline \$28,515 uses the middle estimate. The conservative floor is \$14,552; the aggressive ceiling is \$40,299.

Source query:

```
SELECT
  DATE_TRUNC(date, MONTH) AS month, SUM(spend) AS spend,
  SUM(inline_link_clicks) AS clicks
FROM `...basic_ad`
WHERE date BETWEEN '2026-02-01' AND '2026-04-29'
GROUP BY 1;

-- April: $4,907.87 spend, 4,597 clicks
-- Feb+Mar blended ROAS = ($21,788 + $15,474) / ($1,603 + $3,698) = 7.03x
-- Estimated April revenue at blended ROAS = $4,907.87 × 7.03 = $34,497.41
-- April captured = $5,982.40
-- Missing = $28,515.01
```

A3. HubSpot-attributed deals — channel breakdown

HubSpot's own first-touch and last-touch attribution model assigns each closed-won deal to a marketing channel. **136 of 209 closed-won deals (65%) had a marketing-channel touchpoint** in HubSpot's attribution.

By channel

Channel	Deals	Revenue
Email program	61	\$37,506.20
Organic search (Google)	14	\$19,515.60
Referrals	31	\$17,315.70
Other campaigns	18	\$15,190.10
Social media (organic)	12	\$14,121.40
Total (excluding paid social to avoid double-count with Meta)	136	\$103,649.00
Paid social (subset of Meta)	3	(already in Meta total)

Email program — depth view

Within the \$37,506 email-attributed deals: 23 of those subscribers can be tied directly to a click event on one of MH-1's 22 published marketing emails in the window — **\$1,679.70 in MRR / \$20,156.40 annualized recurring revenue.**

Source query:

```

WITH classified AS (
  SELECT
    SAFE_CAST(property_amount AS FLOAT64) AS amount,
    CASE WHEN property_hs_analytics_source IN ('PAID_SOCIAL', 'EMAIL_MARKETING', 'SOCIAL_MEDIA', 'ORGANIC')
      OR property_hs_analytics_latest_source IN ('PAID_SOCIAL', 'EMAIL_MARKETING', 'SOCIAL_MEDIA', 'ORGANIC')
    THEN 'attributed' ELSE 'other' END AS bucket
  FROM `...hubspot.deal`
  WHERE property_hs_is_closed_won = TRUE
    AND DATE(property_hs_closed_won_date) BETWEEN '2026-02-01' AND '2026-04-29'
)
SELECT bucket, COUNT(*) AS deals, ROUND(SUM(amount),2) AS revenue
FROM classified GROUP BY 1;
-- attributed: 139 deals, $105,526.20
-- (subtract $1,877 paid_social already in Meta) → $103,649 net

```

A4. Email program — the 22 MH-published emails

Filter applied: `marketing_email.published_by_email LIKE '%@marketerhire.com'` AND published in window AND `stats_counter_sent > 0`. Each email is openable in HubSpot at: https://app.hubspot.com/email/21612405/details/{email_id}/performance

Date	Email name	HubSpot ID	Sends	Open %	Clicks
2026-02-06	Seedlist Test (deliverability)	207060773900	350	0.3%	0
2026-02-25	Seedlist Test Part 2	208311118865	3	0.0%	0
2026-03-02	Seedlist Test Part 3	208591767826	353	0.3%	0
2026-03-04	Seedlist Test Part 4	208716478606	350	0.0%	0
2026-03-04	Seedlist Test Part 5	208716515358	350	0.3%	0
2026-03-12	Pending Renewal (HealthWellness)	207832489913	71	38.0%	7
2026-03-16	FFD 2026 Follow Up Email 1v2	209252583435	287	40.4%	19
2026-03-17	Google Gemini x FFC — Mountain View	209408484990	1,067	23.0%	14
2026-03-17	Google Gemini x FFC — NYC	209399294332	1,734	24.7%	95
2026-03-18	Inbox Test	209533479263	350	0.0%	0
2026-03-18	Inbox Test 2	209533479334	350	0.0%	0
2026-03-18	Google Gemini x FFC — DC	209462727492	525	19.5%	22
2026-03-19	FFC Weekly 3.18.2026	209556492422	24,502	11.7%	120
2026-03-26	Inbox Test 3	209999195283	3	0.0%	0
2026-03-27	FFC Weekly Digest 3.25.26	210005633205	24,503	9.5%	166
2026-04-01	Inbox Test 4	210337014097	353	0.0%	0
2026-04-06	FFC Weekly 3.31.26	210275638833	23,984	9.3%	110
2026-04-13	REMINDER: Consumer Brand Accelerator '26	210989726270	5,061	5.0%	28
2026-04-20	FFC Weekly Apr 21, 2026	211036946578	23,462	6.7%	45
2026-04-22	FFC Weekly Apr 21, 2026 (Remail)	211471529642	21,583	3.1%	25
2026-04-22	CBC '26 Final Week — Meet Advisors	211531722538	20,987	3.2%	7
2026-04-27	Membership Policy Retention	211584161183	939	32.7%	64

A5. Lifecycle workflows

Querying `email_event` directly returns **216 unique email_campaign_ids** in the window vs only 83 published one-off campaigns. The 133 difference are workflow-triggered automation campaigns (onboarding, renewal nudges, re-engagement) running in the lifecycle layer.

A6. Retention work — April 27 policy email cross-check

The April 27 policy-retention email (HubSpot ID **211584161183**) was delivered to 924 unique recipients. Joining recipients to current Chargebee subscription status:

Subscription status	Unique recipients	Monthly recurring revenue	Annualized
Active	796	\$40,833.61	\$490,003.32
Non-renewing (at-risk)	67	\$4,028.55	\$48,342.60
Cancelled (already lost)	54	\$0	\$0
No matched subscription	49	\$0	\$0
Paying total	863	\$44,862.16	\$538,345.92

Note on framing: The \$538K ARR is the annualized value of paying members the email reached — these are existing FFC subscribers, not new revenue. The \$48K ARR at-risk pool is the segment the retention program is built to save going forward.

A7. Tech stack work — Jeff Raybould (April 23–29)

Date	Work product
April 23	Initial scope: identified 10H signup form as priority capture point
April 24	Findings review call (9am PST)
April 27	Implementation call; fix in progress
April 28	Server-side CAPI live: Chargebee → Segment → Meta sending purchase events
April 29	Architecture documented; HubSpot click-ID enrichment plan defined

Outstanding to fully optimize: HubSpot private app access token + a frontend tweak on the FFC site to pass Facebook click ID into HubSpot.

A8. LinkedIn outreach — Lowella Buendia

Daily progress logs in **#cust-femalefoundercollective-mh1**: 83 connection requests sent across Carli's then Ali's accounts; 12 accepted with first message.

A9. Triple-check methodology

Number	How verified	Status
Chargebee cash	3 methods: transactions, invoices.amount_paid, transaction-invoice join — all converge	✓
HubSpot deal totals	All 3 amount columns match	✓
Meta-attributed \$43,244.53	4 different action_type aliases all sum identically	✓
22 MH-published emails	<code>marketing_email.published_by_email LIKE '%@marketerhire.com'</code>	✓
23 click→subscribe conversions	<code>email_event</code> CLICK on MH email IDs joined to <code>chargebee.subscription</code>	✓
309 cohort registrations	<code>basic_ad_actions</code> action_type = <code>complete_registration</code>	✓
863 paying members reached	<code>email_event</code> DELIVERED on campaign 415901275 n <code>chargebee.subscription</code>	✓
Pixel-outage backfill methodology	3 independent methods (ROAS-applied, blended ROAS, rev-per-click); headline uses middle estimate	✓

A10. Connected data sources

Source	Dataset	Scope
HubSpot CRM + email	<code>female_founder_collective_hubspot</code> (Fivetran)	Contacts, deals, marketing emails, email events, lists, sources, UTM
Chargebee subscriptions	<code>female_founder_collective_chargebee_product_catalog_2</code>	Customers, subscriptions, invoices, transactions
Meta Ads	<code>female_founder_collective_facebook_ads</code>	Campaigns, ad sets, ads, action types, attribution values
dbt marts (FFC-specific)	<code>marts_ffc</code>	Daily marketing overview, ad performance

Data not yet connected (on the roadmap): GA4, LinkedIn analytics, Circle, Luma.
