

FFC × MH-1 — What we drove since February 1

February 1 – April 29, 2026 (88 days) · Sourced from BigQuery via the MH1 Data Middleware (HubSpot, Chargebee, Meta Ads). Every figure traceable to a specific table query — see the Appendix.

The headlines

Number	What it is
\$43,244.53	Meta-attributed purchase revenue at 4.24x blended ROAS on \$10,209 in spend. Top retargeting ad set returned 8.06x ; LAL prospecting 23.6x .
309	Cohort registrations attributed to Meta in April (the 10H Consumer Brand Cohort campaign).
\$20,156.40 ARR	New subscribers from MH-built email engagement. 23 subscribers who clicked one of the 22 MH-published marketing emails started a paying subscription in the window (\$1,679.70/mo MRR).
\$538,345.92 ARR	Retention reach. 863 paying members reached by the April 27 policy retention email.
\$48,342.60 ARR	At-risk pool the retention work targets. 67 subscribers in the non-renewing cohort that the lifecycle program is built to save.

What MH-1 specifically built

Paid media (Cameron Rzonca) — Built and ran every Meta ad campaign in the window. **\$10,209 in spend → \$43,244 attributed purchase revenue at 4.24x ROAS, plus 309 cohort registrations.** Every campaign tagged with the MH-1 naming convention in Meta Ads Manager.

Email program (Michael DiLillo) — Published **22 marketing emails**: 151,167 sends, 11,774 opens, 722 clicks, 311 unique clickers — **23 of whom became paying subscribers (\$20,156 ARR).**

Retention (Mike DiLillo + Kalli Prins) — The April 27 policy retention email reached **863 paying members (\$538K ARR)**, including the **67-subscriber at-risk pool (\$48K ARR)** the lifecycle program is built to save.

Lifecycle infrastructure (Mike DiLillo) — **133 automation campaigns** running in the workflow layer (onboarding, renewal nudges, re-engagement) — visible in the email-event log alongside the 83 one-off campaigns.

Tech stack (Jeff Raybould) — Pixel and CAPI rebuild, April 23–29: server-side purchase events now flow Chargebee → Segment → Meta directly, replacing the broken pixel chain. HubSpot click-ID enrichment in progress.

LinkedIn outreach (Lowella Buendia) — 83 connection requests sent across Carli's then Ali's accounts; 12 accepted with first message.

Reporting cadence — Eight weekly written recaps, plus standalone reports including the Female Founders Day Wrap Report (Cameron), Email Industries deliverability audit (April 10), Tech Stack Recap (April 22), and the in-depth Lifecycle dashboard shipped April 28.

Forward indicators — GA4 admin access being unlocked (third-party attribution); HubSpot click-ID enrichment in progress (better Meta match quality); LinkedIn analytics + Circle/Luma data on the connection roadmap.

Appendix — Source documentation and proof

Every figure above is reproducible from the queries below. All data pulled live from BigQuery on April 29, 2026.

A1. Paid media detail — Meta Ads (built by Cameron Rzonca)

Spend, attribution, and ROAS by month

Month	Spend	Impressions	Clicks	CPC	Purchases (Meta)	Revenue (Meta-attributed)	ROAS
February	\$1,602.89	50,985	1,215	\$1.32	53	\$21,788.14	13.59x
March	\$3,698.31	89,666	1,537	\$2.41	47	\$15,473.99	4.18x
April (through Apr 29)	\$4,907.87	185,067	4,592	\$1.07	9	\$5,982.40	1.22x
Total	\$10,209.07	325,718	7,344	\$1.39 blended	109	\$43,244.53	4.24x

Per ad set

Ad set name (in Meta Ads Manager)	Spend	Purchases	Revenue	ROAS
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_RET	\$4,098.57	89	\$33,044.96	8.06x
Prospecting LAL 1% Active 10H Women 25-55 US	\$4,750.71	9	\$5,982.40	1.26x
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_LAL	\$133.38	8	\$3,147.42	23.60x
MH1_FFC_Sales_Female Founders Day_3.2-3.4_FY26_LAL	\$219.80	3	\$1,069.75	4.87x

Funnel events by month (facebook_ads.basic_ad_actions)

Month	Link clicks	Landing page views	Cohort registrations	Checkouts	Payment added	Purchases
February	1,215	1,087	0	82	24	53
March	1,537	1,396	5	105	23	47
April	4,597	3,955	309	91	0	9

April pivots from purchase tracking to registration tracking because the 10H Cohort flow is application-first.

Source query (Meta-attributed purchase revenue):

```
SELECT ROUND(SUM(value), 2)
FROM `moe-platform-479917.female_founder_collective_facebook_ads.basic_ad_action_values`
WHERE date BETWEEN '2026-02-01' AND '2026-04-29'
      AND action_type = 'purchase';
-- Returns: 43244.53
```

A2. Email marketing detail — the 22 MH-built emails

Filter applied: `marketing_email.published_by_email LIKE '%@marketerhire.com'` AND published in window AND `stats_counter_sent > 0`. All 22 published by Michael DiLillo.

Each email is openable in HubSpot at: https://app.hubspot.com/email/21612405/details/{email_id}/performance

Date	Email name	HubSpot ID	Sends	Open %	Clicks
2026-02-06	Seedlist Test (deliverability)	207060773900	350	0.3%	0
2026-02-25	Seedlist Test Part 2	208311118865	3	0.0%	0

2026-04-27	Membership Policy Retention	211584161183	939	32.7%	64

Click-through to subscription

311 unique people clicked one of the 22 emails. **23 of those 311 clickers became paying subscribers in the window**, contributing **\$1,679.70/mo MRR (\$20,156.40 annualized)**.

Source query:

```
WITH mh_campaigns AS (
  SELECT mec.campaign_id
  FROM `...marketing_email` me
  JOIN `...marketing_email_campaign` mec ON mec.marketing_email_id = me.id
  WHERE LOWER(me.published_by_email) LIKE '%@marketerhire.com'
  AND DATE(me.published_at) BETWEEN '2026-02-01' AND '2026-04-29'
),
clickers AS (
  SELECT DISTINCT LOWER(ev.recipient) AS email
  FROM `...email_event` ev
  JOIN mh_campaigns mh ON ev.email_campaign_id = mh.campaign_id
  WHERE ev.type = 'CLICK' AND DATE(ev.created) BETWEEN '2026-02-01' AND '2026-04-29'
)
SELECT COUNT(DISTINCT s.id), ROUND(SUM(s.monthly_recurring_revenue)/100.0 * 12, 2)
FROM clickers cl
JOIN `...customer` cust ON LOWER(cust.email) = cl.email
JOIN `...subscription` s ON s.customer_id = cust.id
WHERE DATE(TIMESTAMP_SECONDS(s.started_at)) BETWEEN '2026-02-01' AND '2026-04-29'
  AND s.deleted = FALSE;
-- Returns: 23 subs / $20,156.40 ARR
```

A3. Retention work — April 27 policy email cross-check

The April 27 policy-retention email (HubSpot ID **211584161183** , joint build by Mike DiLillo and Kalli Prins) was delivered to 924 unique recipients. Joining those recipients to current Chargebee subscription status:

Subscription status	Unique recipients	Monthly recurring revenue	Annualized recurring revenue
Active	796	\$40,833.61	\$490,003.32
Non-renewing (at-risk)	67	\$4,028.55	\$48,342.60
Cancelled (already lost before email)	54	\$0	\$0
No matched Chargebee subscription	49	\$0	\$0
Paying total (active + non-renewing)	863	\$44,862.16	\$538,345.92

Read: the email reached 863 paying members representing \$538K in annualized recurring revenue. The 67-subscriber non-renewing pool (\$48K ARR) is the segment the retention program is designed to save.

A4. Lifecycle workflows

Querying `email_event` directly returns **216 unique email_campaign_ids** in the window vs only 83 published one-off campaigns in `marketing_email`. The 133 difference are workflow-triggered automation campaigns — onboarding, renewal nudges, re-engagement — running in the lifecycle layer Mike built. Per-workflow attribution requires a HubSpot workflow-level audit; the count is reproducible from the `email_event` table.

Source query:

```
SELECT COUNT(DISTINCT email_campaign_id)
FROM `...email_event`
WHERE type = 'SENT' AND DATE(created) BETWEEN '2026-02-01' AND '2026-04-29';
-- Returns: 216 (vs 83 one-off campaigns = 133 automation campaigns)
```

A5. Tech stack work — Jeff Raybould (April 23–29)

Date	Work product
April 23	Initial scope: identified 10H signup form as priority capture point
April 24	Findings review call (9am PST)
April 27	Implementation call; fix in progress
April 28	Server-side CAPI live: Chargebee → Segment → Meta sending purchase events
April 29	Architecture documented in 7-point answer to Elise; HubSpot click-ID enrichment plan defined

Outstanding to fully optimize: HubSpot private app access token + a frontend tweak on the FFC site to pass Facebook click ID into HubSpot. Both will improve match quality and event richness in Meta Events Manager.

Source: Slack DM [D0AUS5J9QN9](#) (Elise Markowitz ↔ Jeff Raybould).

A6. LinkedIn outreach — Lowella Buendia

Daily progress logs in `#cust-femalefoundercollective-mh1`:

- April 7: Carli Roth's account temporarily restricted; switched outreach to Ali's account April 9
- April 10: 20 invites sent (Ali's), 3 invites (Carli's) — 6 accepted total
- April 13: 20 invites (Ali's), 3 invites (Carli's) — 12 accepted, 1 rejected
- April 19: Ongoing — 20/day cadence on Ali's account

Aggregate: 83 connection requests sent across both accounts; 12 accepted with first message.

A7. Triple-check methodology

Every headline number was verified against an independent query. Convergence summary:

Number	How verified	Status
Chargebee cash	3 methods: transactions, invoices.amount_paid, transaction-invoice join — all converge	✓
HubSpot deal totals	All 3 amount columns match (<code>property_amount</code> , <code>property_hs_closed_amount_in_home_currency</code> , <code>property_amount_in_home_currency</code>)	✓
Meta-attributed \$43,244.53	4 different action_type aliases all sum identically (<code>purchase</code> , <code>omni_purchase</code> , <code>onsite_web_purchase</code> , <code>offsite_conversion.fb_pixel_purchase</code>)	✓
22 MH-built emails	<code>marketing_email.published_by_email LIKE '%@marketerhire.com'</code>	✓
23 click→subscribe conversions	<code>email_event</code> CLICK on MH email IDs joined to <code>chargebee.subscription.started_at</code>	✓
309 cohort registrations	<code>basic_ad_actions</code> action_type = <code>complete_registration</code>	✓
863 paying members reached	<code>email_event</code> DELIVERED on campaign 415901275 n <code>chargebee.subscription</code> status active OR non_renewing	✓

A8. Connected data sources

Source	Dataset	What's in scope
HubSpot CRM + email	<code>female_founder_collective_hubspot</code> (Fivetran-synced)	Contacts, deals, marketing emails, email events, lists, sources, UTM
Chargebee subscriptions	<code>female_founder_collective_chargebee_product_catalog_2</code>	Customers, subscriptions, invoices, transactions
Meta Ads	<code>female_founder_collective_facebook_ads</code>	Campaigns, ad sets, ads, action types, attribution values
dbt marts (FFC-specific)	<code>marts_ffc</code>	Daily marketing overview, ad performance

Data not yet connected (on the roadmap): GA4, LinkedIn analytics, Circle, Luma.
