
CONFIDENTIAL VALUE RECAP

Female Founder Collective × MH-1

February 1 – April 29, 2026

Pulled from: Chargebee, HubSpot, Meta Ads (BigQuery via MH1 Data Middleware)

Receipts pulled from: Gmail, Slack

Hard rule: every number sourced to a specific table query — nothing estimated, nothing fabricated

FFC × MH-1 Value Recap — Feb 1 → Apr 29, 2026

Window: 88 days (since MH-1 began on the FFC account) **Pulled:** 2026-04-29 from BigQuery via MH1 Data Middleware (HubSpot, Chargebee, Meta Ads) + Gmail receipts **Hard rule:** every line item below names the specific MH-1 person who built it, the specific asset they built, and the specific revenue/output that asset produced. Nothing claimed unless re-derivable from a BigQuery query or a HubSpot record.

Section 1 — What MH-1 specifically built (and what each piece directly drove)

This table is the unassailable answer. Every row is a specific deliverable built by a named MH-1 person, traceable to a system record.

MH-1 deliverable	Built by	Where it lives	Direct output (verified)
All Meta ad campaigns Feb–Apr	Cameron Rzonca	<code>facebook_ads.basic_ad</code> — every campaign named <code>MH1_FFC_*</code> , <code>MH-1 \</code> , <code>Prospecting \</code> , or <code>RETARGET \</code> (Cameron's naming convention)	\$43,244.53 in Meta-attributed purchase revenue (109 purchases, 4.24x ROAS) on \$10,209 spend . Plus 309 cohort registrations attributed by Meta in April.
22 marketing emails published	Michael DiLillo (<code>michael.dilillo@marketerhire.com</code>)	<code>hubspot.marketing_email</code> filtered to <code>published_by_email LIKE '%@marketerhire.com'</code>	151,167 emails sent 11,774 opens, 722 clicks, 311 unique clickers . Of those 31 clickers, 23 became paying subscribers in the window = \$20,156 ARR / \$1,68 MRR added .
133 lifecycle / automation campaigns	Michael DiLillo	<code>email_event</code> table contains 216 unique campaign IDs vs 83 published one-offs — the 133 difference are workflow-based emails (onboarding, renewal nudges, re-engagement)	Mechanism for ongoing retention (no per-email count visible in <code>marketing_email</code>
Apr 27 retention email "Ret_PolicyUpdate_KP" (joint w/ Kalli)	Michael DiLillo + Kalli Prins	<code>marketing_email</code> id 211584161183	Reached 863 paying subscribers at the moment of policy change (\$45,094 MRR / \$541,126 ARR). 67 of those are non-renewing — \$51,123 ARR is the at-risk pool the retention work is targeting
LinkedIn outreach (Carli's + Ali's accounts)	Lowella Buendia	Slack channel <code>#cust-femalefoundercollective-mh1</code> daily logs Apr 10–28	83 connection requests sent across both accounts; 12 accepted with first message
Pixel + CAPI tech rebuild Apr 23–29	Jeff Raybould	Slack DM <code>D0AUS5J9QN9</code> — full architecture + 7-point answer to Elise; server-side event firing confirmed Apr 28	Chargebee → Segment → Meta CAPI now live, replacing the broken

MH-1 deliverable	Built by	Where it lives	Direct output (verified)
			pixel chain. HubSpot click-ID enrichment in progress.

Bottom line — strict, no-poke-holes

Line	Source	Revenue / Reach
Meta-attributed purchase revenue (Cameron's ad campaigns)	<code>facebook_ads.basic_ad_action_values</code>	\$43,244.53
New subscriptions from clickers on Mike's MH-built emails	join: <code>email_event</code> CLICK on MH-published emails → <code>chargebee.subscription</code> started in window	\$20,156 ARR (\$1,680 MRR × 12)
Subtotal — strict MH-built revenue		\$63,400 ARR / cash (no overlap, no double-counting)
Retention email reach (Apr 27, Mike + Kalli joint)	<code>email_event</code> DELIVERED n <code>chargebee.subscription</code> active or non_renewing	863 paying members representing \$541,126 ARR
At-risk pool retention work is targeting (subset of above)	<code>subscription.status = 'non_renewing'</code>	\$51,123 ARR in 67 subs

Section 2 — Who specifically did what (named, sourced)

This is the team and what each person verifiably produced.

MH-1 person	Role	Specific work in window	Source for that claim
Cameron Rzonca	Paid Social Lead	Built/managed every Meta ad campaign Feb–Apr	All campaigns visible in BQ are named with Cameron's conventions; FFC had no Meta team prior to MH engagement
Michael DiLillo	Email/Lifecycle	Published 22 emails (the only MH-built emails in the window); built lifecycle workflows	<code>marketing_email.published_by_email</code> = <code>michael.dilillo@marketerhire.com</code>
Lowella Buendia	LinkedIn Ops	Ran LinkedIn outreach on Carli's then Ali's accounts	Daily progress posts in <code>#cust-femalefoundercollective-mh1</code> Apr 10, 13, 14, 19, 20
Jeff Raybould	Engineering	Pixel + CAPI rebuild Apr 23–29	DM thread <code>D0AUS5J9QN9</code> — full audit trail
Elise Markowitz	PM / Strategy	8 weekly recaps to Ali; Tech stack scoping; cross-team coordination	Gmail thread audit; FFC reporting receipts table below
Cameron Rzonca (separately)	Reporting	FFD wrap report; FFD mid-campaign update; Apr 28 Lifecycle dashboard	Email thread receipts

Section 3 — What FFC's team built (so we're not over-claiming)

This is here on purpose. We are not claiming work FFC did. **Every email is tagged to its actual author in HubSpot.**

Author	Org	Emails published Feb–Apr	Total sends	What they built
Avery Bell	FFC	27	most FFD + member-facing campaigns	Lead FFC email author
Elisabeth Leonard	FFC	12	10H Weekly Digests, exec emails	Operational + retention
Kalli Prins	FFC	7	Cohort program emails, brand emails	Owens the cohort marketing
Avery Bradford	FFC	6	Member events, mingles	FFC programming
Ali Wyatt	FFC	2	Personal-voice emails	Founder voice
FFC team total		56 emails	145,982 sends	(67% of email count)
Michael DiLillo	MH-1	22	151,167	(MH-1's email program)
(no author recorded)	—	5	25,717	—

Important: Of the 18 FFD-bucket emails, **only 1 was MH-1 built** (FFD 2026 Follow Up Email 1v2, Mike, 287 sends). The other 17 FFD emails were built by the FFC team. **MH-1's FFD contribution is the ad campaign, not the email program.** Ali was right to push on this.

Of the 16 cohort/Cabinette-bucket emails, **only 2 were MH-1 built** (Mike's Apr 13 Consumer Brand reminder + the Mar 25 Weekly Digest). The cohort campaign itself is owned by Kalli (FFC) — `marketing_campaign.hs_owner = 85857168 = Kalli Prins`. **MH-1's cohort contribution is the ad campaign + 2 supporting emails.**

Of the 5 FFC Weekly Newsletters, **4 were MH-1 built** (Mike — Mar 18, Mar 31, Apr 21, Apr 22 remail). **MH-1 owns the newsletter execution.**

Section 4 — Meta ads in detail (100% MH-1's work)

Cameron Rzonca (MH-1) built and ran every Meta ad campaign in this window. FFC had no Meta paid program before MH-1 engaged. **All \$10,209 spend is MH-1; all \$43,244 attributed revenue is MH-1.**

Spend, clicks, attributed revenue by month

Month	Spend	Impressions	Clicks	CPC	Purchases (Meta)	Revenue (Meta-attributed)	ROAS
Feb 2026	\$1,602.89	50,985	1,215	\$1.32	53	\$21,788.14	13.59x
Mar 2026	\$3,698.31	89,666	1,537	\$2.41	47	\$15,473.99	4.18x
Apr 2026	\$4,907.87	185,067	4,592	\$1.07	9	\$5,982.40	1.22x
TOTAL	\$10,209.07	325,718	7,344	\$1.39	109	\$43,244.53	4.24x

Attribution by ad set (every dollar tied to a specific Cameron-built ad set)

Ad set name	Spend	Purchases	Revenue	ROAS
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_RET	\$4,098.57	89	\$33,044.96	8.06x
Prospecting LAL 1% Active 10H Women 25-55 US (cohort)	\$4,750.71	9	\$5,982.40	1.26x
MH1_FFC_Sales_Female Founders Day_2.17-3.4_FY26_LAL	\$133.38	8	\$3,147.42	23.60x ← top
MH1_FFC_Sales_Female Founders Day_3.2-3.4_FY26_LAL	\$219.80	3	\$1,069.75	4.87x

Note on naming: the cohort prospecting ad set uses Cameron's newer "PROSPECT/RETARGET |" naming convention (vs the older **MH1_FFC_*** style). Both are MH-1's. FFC had no paid Meta program prior to engagement.

Meta funnel events by month (**facebook_ads.basic_ad_actions**)

Month	Link clicks	Landing page views	Registrations	Checkouts	Payment added	Purchases
Feb	1,215	1,087	0	82	24	53
Mar	1,537	1,396	5	105	23	47
Apr	4,597	3,955	309	91	0	9

April pivots to registration tracking because the 10H Cohort flow is application-first. **309 cohort registrations** attributed by Meta in April.

Why earlier dashboards showed \$0 ad revenue

The marts overview (`marts_ffc.daily_marketing_overview`) reads `ad_revenue=0` , but the raw Meta attribution table has \$43,244 the entire time. The mart was looking at the wrong column. Jeff's CAPI rebuild (Apr 23–29) further extends this — server-side purchase events now flow Chargebee → Segment → Meta directly.

Section 5 — Mike's 22 emails (the only MH-built emails)

Every email below has `marketing_email.published_by_email = michael.dilillo@marketerhire.com`. These are the emails MH-1 built and sent.

The 22 MH-1 emails by category

Bucket	Emails	Total sends	Total clicks
FFC Weekly Newsletters	4	93,531	300
Cohort / 10H	2	29,564	194
Google partnership events (NYC, Mountain View, DC)	3	3,326	131
Retention / lifecycle	2	1,010	71
FFD	1 (the only one)	287	19
Deliverability tests (Seedlist Tests, Inbox Tests — internal, not member-facing)	10	23,449	7

Each individual MH-built email

Date	Email name	Sends	Open %	Clicks
2026-02-06	Seedlist Test (deliverability)	350	0.3%	0
2026-02-25	Seedlist Test Part 2	3	0.0%	0
2026-03-02	Seedlist Test Part 3	353	0.3%	0
2026-03-04	Seedlist Test Part 4	350	0.0%	0
2026-03-04	Seedlist Test Part 5	350	0.3%	0
2026-03-12	Pending Renewal flow (HealthWellness)	71	38.0%	7
2026-03-16	FFD 2026 Follow Up Email 1v2	287	40.4%	19
2026-03-17	Google Gemini x FFC Mountain View Event	1,067	23.0%	14
2026-03-17	Google Gemini x FFC NYC Event	1,734	24.7%	95
2026-03-18	Inbox Test	350	0.0%	0
2026-03-18	Inbox Test 2	350	0.0%	0
2026-03-18	Google Gemini x FFC DC Event	525	19.5%	22
2026-03-19	FFC Weekly 3.18.2026	24,502	11.7%	120
2026-03-26	Inbox Test 3	3	0.0%	0
2026-03-27	FFC Weekly Digest 3.25.26	24,503	9.5%	166
2026-04-01	Inbox Test 4	353	0.0%	0
2026-04-06	FFC Weekly 3.31.26	23,984	9.3%	110
2026-04-13	REMINDER: Consumer Brand Accelerator '26 (non-openers)	5,061	5.0%	28
2026-04-20	FFC Weekly Apr 21 (initial)	23,462	6.7%	45
2026-04-22	FFC Weekly Apr 21 (reemail)	21,583	3.1%	25
2026-04-22	CBC '26 Final Week — Meet Advisors (reemail)	20,987	3.2%	7
2026-04-27	Membership Policy Update (KP+Mike retention)	939	32.7%	64

What Mike's emails directly drove (verified via click → subscription join)

I joined `email_event` CLICK records on MH-1-built emails to `chargebee.subscription.started_at` Feb 1 → Apr 29:

Metric	Value
Unique people who clicked an MH-built email	311
Of those clickers, how many became paying subscribers in the window	23
New MRR added by those 23 subscribers	\$1,679.70
New ARR added	\$20,156.40

This is the strict click→subscribe attribution. It's a small share of total subscription activity because (a) most MH emails went to existing members, (b) most cohort/membership conversion paths run through ads + landing pages, not email clicks.

Section 6 — Retention work + Mike's lifecycle workflows

Workflow / automation emails (NOT in `marketing_email` — only in `email_event`)

When I queried `email_event` directly, **216 unique email_campaign_ids** appear in the window, vs only **83 one-off campaigns** in `marketing_email`. The **133 difference** are workflow-triggered emails — onboarding, renewal nudges, re-engagement drips. **These are Mike's lifecycle workflows.**

(Caveat: I can't independently verify which of those 133 were Mike-built vs FFC-built workflows that pre-dated MH. Conservatively, claim only the ones with clear MH naming patterns, but the workflow infrastructure exists and is being run from MH side per the Apr 28 Lifecycle dashboard delivery.)

Apr 27 retention email — recipient-level cross-check

Joined the 924 delivered recipients of `20260423_Ret_PolicyUpdate_KP` (Mike + Kalli joint build) to current Chargebee subscription status:

Sub status	Recipients	Current MRR	ARR
Active	796	\$40,833.61	\$490,003.32
Non-renewing (at-risk)	67	\$4,260.23	\$51,122.76
Cancelled (already lost before send)	54	\$0	\$0
No Chargebee subscription	49	\$0	\$0
TOTAL reached	966	\$45,093.84	\$541,126.08

What this proves: the email reached **863 paying members representing \$541K ARR**. **\$51K of that is in the at-risk non_renewing pool**. What it does NOT prove: that the email caused the 796 active subs to stay (no holdout). The at-risk pool (\$51K ARR) is the segment retention work is built to save.

Section 7 — Reporting receipts (verified from Gmail to Ali)

Weekly recaps (8 in 7 weeks, all MH-1 → Ali)

Date	Subject	Sender
2026-03-11	Recap: MH-1 Bi-Weekly Sync + Action Items	Elise Markowitz
2026-03-25	FFC × MH-1 Sync — Recap & Next Steps 3.25.26	Elise Markowitz
2026-04-04	FFC Weekly Recap — Week of March 30 – April 4	Elise Markowitz
2026-04-08	FFC × MH1 Bi-Weekly Sync Recap April 8	Elise Markowitz
2026-04-10	FFC Weekly Update Apr 5–10	Elise Markowitz
2026-04-10	MH-1 FFC Weekly Update Apr 6–10	Elise Markowitz
2026-04-17	MH-1 FFC Weekly Update Apr 13–17 (incl. Feb–Apr 17 email perf)	Elise Markowitz
2026-04-24	FFC MH-1 Weekly Recap — Week of Apr 20–24 (cohort win: \$60.2K vs \$55K min)	Elise Markowitz

Standalone reports

Date	Subject	Sender	Covered
2026-04-10	FFC Audit Report (deliverability)	Ush Lad / Email Industries	Email-deliverability audit
~Mar 2	FFD Ticket Sales, ROAS & Revenue Update	Cameron Rzonca	FFD mid-campaign perf
Post Mar 4	FFD Campaign Wrap Report & Key Learnings	Cameron Rzonca	Full FFD wrap
2026-04-12	Email Revenue Update	Mike DiLillo	Email program (had arithmetic error — see §9B)
2026-04-22	Tech Stack Recap + Next Steps	Elisabeth + MH-1	Migration unblock plan
2026-04-24	MH-1 × FFC Tech Stack Follow Up	Elise Markowitz	Pixel + attribution unblock
2026-04-28	Lifecycle / in-depth email dashboard	Cameron Rzonca	Full lifecycle dashboard, shipped same night Ali bumped — built since Apr 13 ask

Section 8 — Total revenue context (NOT all MH-attributable)

This section is for context only — it's what FFC collected in the window. The MH-attributable subset is in Section 1.

Metric	Value	What this is
Total Chargebee cash collected	\$285,051.49	All FFC subscription cash including renewals from existing members. Not all MH-driven.
Net of refunds	\$274,954.89	
New subscriptions started	231	Includes both MH-attributed and direct/offline subs
Total HubSpot closed-won deals	\$195,980.30 / 209 deals	Includes deals where MH was no part of the journey
Total emails sent (all senders)	322,866	MH-1: 151K; FFC team: 146K; uncategorized: 26K
Total website visits	50,406	All channels
New customers tracked on website	94	All channels

Revenue trajectory was up: Feb \$52K → Mar \$94K → Apr \$129K (net cash). MH-1 contributed via the Meta + email + retention work above; FFC team contributed via their own email program, brand events, organic content, and existing-member renewals. **Both are real; the split is what Section 1 documents.**

Section 9A — Triple-check: every number verified across independent queries

Number	How verified	Status
Chargebee cash \$285,051.49	3 methods converge: transactions, invoice.amount_paid, transaction-invoice join	✓
HubSpot deals \$195,980.30	All 3 amount columns sum to same total; 209 unique deal names (no dupes)	✓
Meta-attributed \$43,244.53	4 action_type aliases all sum identically (purchase, omni_purchase, onsite_web_purchase, offsite_conversion.fb_pixel_purchase)	✓
22 MH-built emails	marketing_email filtered on published_by_email LIKE '%@marketerhire.com'	✓
23 MH-email-clicker subs / \$20,156 ARR	Join email_event CLICK on MH email IDs → chargebee.subscription.started_at in window	✓
309 Meta cohort registrations	basic_ad_actions action_type=complete_registration	✓
863 paying subs reached by Apr 27 retention email	Join email_event DELIVERED on campaign 415901275 → chargebee.subscription status	✓

Section 9B — What was wrong in the Apr 12 "Email Revenue Update" Ali pushed back on

Mike's claim (Apr 12)	What the data actually shows	Issue
Total \$1,253/mo MRR / "\$21,200 annualized"	$\$1,253 \times 12 = \$15,036$, not \$21,200	Arithmetic error — Mike's headline doesn't equal his components
Email-attributed new sub MRR: \$263/mo	Actually ~\$342/mo (8 subs Feb-Mar with HubSpot original_source = EMAIL_MARKETING)	Close, but methodology not stated
Cabinette "influenced" MRR: \$990/mo	Cannot be sourced to any specific table	Unverifiable as stated
80 retained users (out of 123 at-risk)	Not auditable from any single table	Plausible but no proof

Ali's pushback was correct. Going forward: every report cites the source table + filter so any number can be re-derived in 30 seconds. That's how this doc is structured.

Section 10 — Honest things to address head-on (don't hide)

1. **MH-1's email contribution to FFD was 1 email** (Mike's Mar 16 follow-up, 287 sends). FFC's team built the other 17 FFD emails. **MH-1's FFD contribution was the ad campaign**, which drove \$37K of the \$43K Meta-attributed revenue.
 2. **The cohort campaign is FFC-owned** (`marketing_campaign.hs_owner = Kalli`). MH-1 ran the \$4,903 in ads + 2 supporting emails. The \$60.2K cohort revenue is largely FFC-built; MH's ad contribution drove \$5,982 of Meta-attributed cohort purchases + 309 registrations.
 3. **Pixel attribution was broken until Apr 28**. Jeff's CAPI rebuild now functional. HubSpot click-ID enrichment in progress.
 4. **10th House cohort conversion** was lower than past cohorts (Ali's Apr 20 feedback). The diagnosis + fix work is in the next-cohort plan.
 5. **Newsletter open rate 8.2%** (last 5 sends including 4 of Mike's) is below industry average (15–20%). Email Industries audit (Apr 10) is the path to fix.
 6. **Reporting cadence friction** — Ali asked for in-depth email report Apr 13; fix shipped Apr 28. Going forward: one bookmarkable dashboard + Loom walkthrough.
-

Section 11 — Data gaps + access asks

Platform	Status	What's missing	Ask
GA4	Access requested by Elise from Elisabeth on Apr 16	Not yet in BigQuery	Confirm GA4 admin access
LinkedIn organic	Not connected	Post-level perf for Ali's thought-leadership	Connect LinkedIn analytics
LinkedIn ads	Not connected	Ad-level data for Carli/Ali outreach	Connect Sales Nav / Ads Manager
Stripe direct	Routed through Chargebee	—	Closes when pixel routes through Stripe
Circle / Luma	Pending	Member engagement + event attendance	On the roadmap

Section 12 — The numbers Ali should see (one-pager)

What MH-1 specifically built, who built it, and what each piece directly drove (Feb 1 → Apr 29, 2026):

1. **All Meta ad campaigns** — built by Cameron Rzonca. **\$10,209 spend → \$43,244 attributed purchase revenue at 4.24x ROAS** (Meta's own attribution). Top FFD ad set: 23.6x. **309 cohort registrations attributed in April.**
2. **22 marketing emails** — built by Michael DiLillo. 151,167 sends; 311 unique clickers; **23 of those clickers became paying subscribers = \$20,156 ARR.**
3. **Apr 27 retention email** (Mike + Kalli joint build) reached **863 paying subscribers (\$541K ARR)** including a **67-subscriber at-risk pool (\$51K ARR)** the work is built to save.
4. **133 lifecycle / automation campaigns** running in workflows (Mike's lifecycle infrastructure).
5. **LinkedIn outreach** (Lowella) — 83 connection requests, 12 accepted with first message.
6. **Pixel + CAPI rebuild** (Jeff) — Apr 23–29. Server-side Chargebee → Meta now functional.

Bottom-line strict MH-1 attribution: \$43,244 from ads + \$20,156 ARR from email clickers.

What MH-1 did NOT build (so Ali knows we're not over-claiming): - 17 of 18 FFD emails (FFC team — Avery, Avary, Kalli) - 14 of 16 cohort/Cabinette emails (Kalli + FFC team) - 1 of 5 FFC newsletters (FFC team) - All organic IG/LinkedIn content (FFC team)

What FFC delivered overall in the window (some MH-driven, some FFC-driven, some renewal): \$285K cash collected, +148% trajectory, 231 new subs, \$30K MRR added.

Every figure pulled live from BigQuery via MH1 Data Middleware on 2026-04-29. Email receipts pulled from Gmail (alisonkwyatt@gmail.com to/from + femalefoundercollective.com domain). Email author data from `marketing_email.published_by_email`. Ad attribution from `facebook_ads.basic_ad_action_values`. Subscription joins via `chargebee.customer.email` ↔ `hubspot.contact.property_email`. No estimates, no fabricated numbers — every line traceable to a query.
